

Dr. Swati Popat Vats Joins Classadia as Advisory Board Member to Champion AI Innovation in Early Education

Pioneering a first-of-its-kind AI-powered intervention and assessment model for preschools — designed to identify learning needs early, reduce educator burnout, and transform how early years education is delivered across India and the GCC.

Welcoming Dr. Swati
Popat Vats To the
Strategic Advisory Board
at Classadia

Dr. Swati Popat Vats

President, ECA-APER

President, Podar Education Network

Mumbai, Maharashtra Aug 4, 2025 ([Issuewire.com](https://www.issuewire.com)) - Classadia, the AI-first operating system built exclusively for preschools and early learning centers, proudly announces the inclusion of Dr. Swati Popat Vats, President of the Early Childhood Association (ECA) and a globally respected voice in early education, to its Advisory Board.

Classadia is pioneering a first-of-its-kind AI-powered assessment and intervention model designed to tackle one of the most pressing challenges in early years education: identifying and addressing learning gaps early, consistently, and ethically, and Dr. Vats will be giving us her invaluable input.

“In my years of working with educators, I’ve seen how early warning signs often go unnoticed—not due to lack of care, but because teachers are overwhelmed,” said Dr. Swati Popat Vats. “AI, when designed in partnership with educators, can become a powerful ally in understanding every child’s journey. Classadia is on the right path—thoughtful, responsible, and educator-first.”

Built for early years institutions across India and the GCC, Classadia already helps schools digitize daily operations—from billing and attendance to observations and [parent communication](#). But this next leap, under Dr. Swati’s academic guidance, moves the platform into the core of pedagogy: enabling educators with real-time insights and intervention tools powered by ethical AI.

“Dr. Swati’s influence in shaping early childhood education is unmatched,” said Musaddiq Shaikh,

Founder and Head of Growth at Classadia. *“Her belief in child-centric, teacher-supported learning aligns perfectly with our vision. Together, we’re building tools that empower—not replace—educators.”*

Introducing the Next Big Thing: AI-Powered Early Intervention

Classadia’s new AI model—currently in development—will be piloted in select schools across India and the UAE within this quarter of 2025. It’s being designed to:

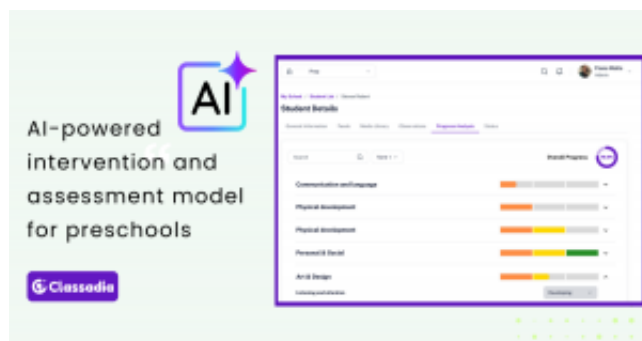

- Detect early signs of developmental, emotional, or cognitive delays
- Provide teacher-assisted, curriculum-aligned interventions
- Generate smart, evidence-backed progress reports for parents
- Reduce educator workload while enhancing insight accuracy

The initiative aims to bridge the gap between daily classroom reality and long-term learning outcomes—ensuring that every child is seen, supported, and celebrated.

About Classadia

Classadia is the all-in-one AI-first [childcare app](https://www.classadia.com), built for the unique needs of early education institutions. From daily school operations to smart assessments and communication, Classadia helps preschools, nurseries, and kindergartens run efficiently, engage parents meaningfully, and make data-driven decisions all from a single system.
