During the retreat, ways to **bring peace to the heart, the family and the community** will be shared with clarity, compassion and heart-centered wisdom. The spiritual support offered includes practical tools to help silence the mind and connect to the heart. These practices and tools can be implemented easily to balance energy and create more inner peace and unity in life.

An aspect of Enlightened Education’s mission is to create as much harmony and perfection as possible on Earth. The name of the retreat, “All is Possible”, is a foundational teaching from Enlightened Education, which provides inspiration to realize that all is truly possible when consciously connecting to the infinite source of creation. Cultivating inner peace is a shift of perspective beginning with the Self and ripples out into the world. It is a reminder of what is possible to create when embodying inner virtues and accepting the greatness of being.

Founders, [Gaitana and Yantal's](#) extended vision for the retreat is ***“to walk the Path of Light and to bring more illumination to Earth & Humanity. You will learn to find hope in the midst of challenges and dissolve the darkness so you may embrace the Light within”***. They encourage willing spiritual seekers and students to take the next step to discover what is possible and learn to live a life of divine purpose.
