

etfot_o: The young Belgian photographer about to dive into the world of underwater photography

Mouscron, Hainaut Sep 21, 2025 ([IssueWire.com](https://www.issuewire.com)) - At just 17 years old, Floquet Ethan, better known under the artistic name etfot_o, is already leaving his mark in the world of photography. What began as a simple passion has quickly turned into a true vocation. With an eye trained to capture detail, light, and emotion, Ethan immortalizes everything from vast mountain landscapes to fleeting encounters with wildlife. His photos are not only images; they are fragments of stories, frozen moments that carry both beauty and meaning.

Passionate about nature and the ocean, he is now preparing to take his art a step further by diving into the fascinating world of underwater photography. For Ethan, this new chapter is more than a technical challenge — it is a way to get closer to the fragile ecosystems hidden beneath the surface, places that few people get the chance to see with their own eyes. Through his lens, he wants to make the invisible visible, to awaken curiosity, admiration, and above all, awareness.

Active on Instagram and Facebook, Ethan shares pictures that resonate with authenticity. Guided by his personal mantra, “See the moment, feel the emotion,” he believes every shot should be a reflection of lived experience.

“This is my way to explore, protect, and inspire,” he explains. Photography is for him a bridge between art and activism, a tool to remind us of the urgent need to preserve our planet.

This young, self-taught talent is currently preparing new marine projects, blending solid technique with a poetic vision. His work promises to evolve, surprise, and inspire a growing community of followers.
