

Free Construction Cost Calculator for Homeowners in India.

JK Cement Launches Free Online Construction Cost Calculator for Indian Homeowners

House Construction Cost Calculator

ITEM	QUANTITY
cement	100
Sand	200ft
Bricks	1000
Stone	200
Steel	200kg

Delhi, India Aug 19, 2025 ([Issuewire.com](https://www.issuewire.com)) - JK Cement, one of India's most trusted names in the cement and building materials industry, has announced the launch of its [Home Construction Cost Calculator](#), a free online tool designed to help homeowners, architects, and contractors estimate the cost of building a house with ease and accuracy.

Helping Homeowners Plan Better

Building a home is one of the biggest financial and emotional decisions for Indian families. However, most first-time builders struggle with questions like *"How much will it cost per square foot?"* or *"What is the right budget for my city?"*

The new **Construction Cost Calculator by JK Cement** simplifies this process. Users can enter their location, plot size, and construction preferences, and the tool instantly generates an approximate cost estimate. This includes **material, labour, and overall construction cost breakdown**, giving users a clearer picture of their budget before they start.

Key Features of the JK Cement Cost Calculator

- **City-wise estimates:** Calculates cost variations between Tier-1 and Tier-2 cities.
- **Per sq ft calculation:** Provides clear cost per square foot for different construction types.
- **Breakdown of expenses:** Includes cement, steel, sand, bricks, and labour.

- **User-friendly interface:** Accessible in just a few clicks, even for first-time users.
- **Free to use:** Available for everyone at no cost.

Statement from JK Cement

Speaking on the launch, a spokesperson from JK Cement said:

“At JK Cement, we believe building a home should be an informed and stress-free experience. The Construction Cost Calculator empowers homeowners with transparency and planning support. It also reflects our commitment to going beyond products and offering meaningful digital solutions for today’s construction needs.”

Why This Tool Matters

India’s construction costs vary widely due to labour rates, material availability, and approval charges across states. For example, **house construction cost in Tier-1 cities like Delhi or Bangalore ranges between ₹1,800–₹3,000 per sq ft**, while in **Tier-2 cities like Indore or Bhopal, it is closer to ₹1,400–₹2,200 per sq ft**.

By using JK Cement’s [Construction Cost Calculator](#), homeowners can plan better, avoid hidden costs, and choose the right cement solutions such as JK Super Strong, [JK Super Protect](#), and [JK PPC Cement](#), depending on their needs.

Availability

The **JK Cement Construction Cost Calculator** is live and can be accessed at:
