

# From Google to Startups: AI Design Subscription Model Arrives at DesignDelulu

Global launch of subscription-based creative services with proven industry credentials.

Chicago, Illinois Aug 11, 2025 ([IssueWire.com](https://www.IssueWire.com)) - DesignDelulu Launches AI-Powered Subscription Design & Development Studio

DesignDelulu is redefining creative services with its AI-powered subscription-based design and development model. Offering unlimited requests for a flat monthly fee, the company blends AI efficiency with decades of professional experience.

Founder Eric Barker previously led a web design agency ranked **top 3 globally for “web design”** for 10 years and **#1 for “Chicago web design.”** His team has worked with clients such as Google, Subway, Unilever, and the City of Chicago.

## How It Works:

- **Subscribe**– Choose a flat monthly plan.
- **Submit Request** – Unlimited projects, handled one at a time.
- **Get Results Fast**– Most projects delivered in 2–3 business days.
- **Unlimited Revisions**— Refined until perfect.

“Businesses want speed, quality, and predictability,” said Eric Barker, Founder of DesignDelulu. “Our subscription model delivers all three while leveraging AI to make the process faster and more affordable.”

## Ideal For:

- Startups scaling quickly
- SaaS companies with ongoing design needs
- Agencies needing overflow support
- Businesses wanting an on-demand creative team

DesignDelulu also offers a **free AI prompt generator** for photos and videos, helping users create perfect prompts to maximize AI-generated results.

The service is designed for startups, SaaS companies, agencies, and any business needing an on-demand creative team without long contracts.
