

Glesec deepens strategic partnerships with radware and cymulate

GLESEC, a leader in integrated cybersecurity operations, today announced strengthened partnerships with global cybersecurity innovators RADWARE and CYMULATE to further expand the reach and capabilities of its Cloud Application Protection Solution.

Florin, California Aug 20, 2025 ([IssueWire.com](https://www.issuewire.com)) - GLESEC, a leader in integrated cybersecurity operations, today announced strengthened partnerships with global cybersecurity innovators RADWARE and CYMULATE to further expand the reach and capabilities of its Cloud Application Protection (CAP) Solution. Building on last year's successful introduction of CAP, these enhanced collaborations solidify both partners' technologies as native integrations within GLESEC's fully managed SKYWATCH™ platform.

Originally launched in August 2024, GLESEC's CAP Solution delivers real-time risk management, continuous protection, and external threat mitigation for Internet-facing assets. The expanded partnerships reinforce GLESEC's ability to scale these services across regulated sectors including financial institutions, healthcare providers, and government entities.

"The market has validated the CAP solution as a transformative approach to protecting digital assets and enabling operational resilience," said Sergio Heker, CEO of GLESEC. "By deepening our native integrations with RADWARE and CYMULATE, we continue to elevate the intelligence, automation, and strategic impact of our SKYWATCH platform—empowering organizations to reduce risk, improve time-to-remediation, and meet the demands of modern cyber governance."

Strategic Integration for Risk Mitigation and Operational Efficiency

GLESEC's CAP Solution is built on native integrations with:

- **RADWARE** – Advanced Web Application Firewall (WAF), Bot Management, and DDoS mitigation
- **CYMULATE** – AI-driven CTEM Validation capabilities, advancing beyond traditional Breach & Attack Simulation
- **SKYWATCH™** – Full-service cybersecurity operating system delivering real-time visibility, mitigation orchestration, and governance compliance time visibility, mitigation orchestration, and governance compliance

Together, these native integrations enable:

- Proactive and reactive application protection
- External attack surface and vulnerability management
- Real-time risk intelligence and performance metrics
- Alignment with NIST cybersecurity and risk management standards

The SKYWATCH™ platform also includes:

- **Persistency-based intent analysis** and automated remediation playbooks
- **SKYWATCH University** for client enablement and acceleration of internal processes
- Full-service cybersecurity operations across IT, OT, and IoT environments, managed 24x7x365

by GLESEC's regional Security Operations Centers

"GLESEC is a trusted cybersecurity innovator with a long-standing commitment to delivering real value to clients," said **Roy Zisapel, Chief Executive Officer**. "We're excited to expand our partnership and help GLESEC's clients protect what matters most in an increasingly hostile threat environment."

"Our collaboration with GLESEC reflects a shared vision for proactive validation and risk-based cybersecurity management," said **Eyal Wachsmann, Chief Executive Officer**. "By embedding AI-powered CTEM validation into the SKYWATCH platform, GLESEC clients gain a measurable advantage in readiness, compliance, and resilience."

Cloud Application Protection is currently being adopted by financial institutions, healthcare organizations, and government entities across the Americas, supported by dedicated onboarding and operational delivery from GLESEC's regional teams.

About GLESEC®

GLESEC is a cybersecurity operations firm with over 20 years of experience delivering integrated, outcome-driven services to regulated enterprises across the Americas. Its proprietary SKYWATCH™ platform functions as a cybersecurity operating system, integrating over 40 managed services and enabling full-spectrum protection, orchestration, and compliance for IT, OT, and IoT environments. GLESEC's unique model bridges risk, compliance, and remediation in one unified approach, backed by dedicated security operations centers and expert service delivery teams.
