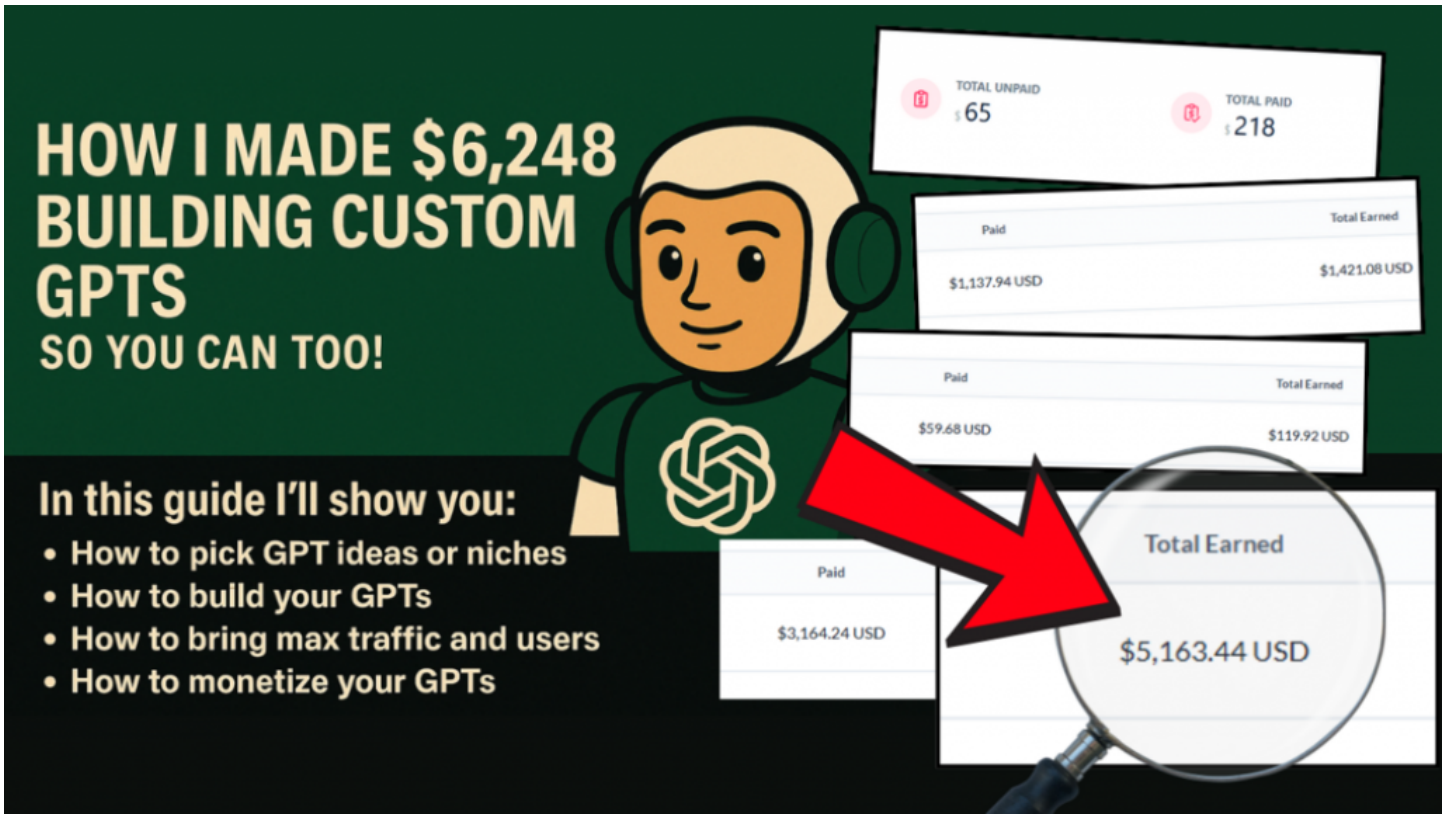
How to Make Money with GPTs on ChatGPT Store

Learn the $6k worth GPT monetization new method - tested and verified (guided steps)



Alabaster, Alabama Sep 14, 2025 (Issuewire.com) - A new actionable blueprint, available at gptsmoney.com, is helping creators learn how to monetize custom GPTs directly from the ChatGPT Store.

This guide compiles tested methods used by early GPT builders who have already earned from affiliate commissions and MRR subscription upgrades inside their published GPTs/tools.

Since the launch of the GPT Store by OpenAI, creators have been exploring monetization strategies. However, most available advice remains vague or untested.

The GPTs Money guide fills this gap by offering a real-world framework used to generate $6,248+ from actual users engaging with custom GPTs.

It includes tools to use, affiliate setup, pricing models, prompt structuring for upsells, and niche targeting insights.

The blueprint emphasizes ethical monetization—meaning creators are encouraged to solve user needs with GPTs and then connect relevant tools as a next step. This creates a helpful user journey, not a pushy one.

GPTs Money Blueprint Key Topics Covered:

- What GPT types convert to revenue (and what to avoid)

- How to use affiliate tools with GPTs

- Prompt design to increase engagement

- Metadata and SEO tricks for GPT Store visibility

- Tips for long-term monetization without spammy tactics

To make money with GPTs on ChatGPT Store, the perfect way is to go to gptsmoney.com, download the guide, and follow the instructions to install affiliate and subscription payments.

The blueprint is available as a guide, no-fluff download. It's ideal for creators, affiliate marketers, and prompt engineers looking to turn GPT building into a side income stream—without requiring a technical background.

$6k worth framework for only $27.
