

inYantra Technologies Recognised Among the Top EMS Companies in India

Strategic investments in advanced SMT lines and Industry 4.0 technologies position inYantra as a trusted partner for high-quality, scalable, and sustainable electronics manufacturing.

Pune, Maharashtra Aug 6, 2025 (Issuewire.com) - [inYantra Technologies](#), a leading provider of Electronic Manufacturing Services (EMS) in India, has been recognized as one of the Top EMS companies in India, reaffirming its reputation as a trusted partner for high-quality, scalable, and reliable electronics manufacturing.

Founded in 2002 and headquartered in Pune, India, [inYantra](#) specializes in [PCB assembly](#), box-build integration, wiring harness manufacturing, and power cord solutions. The company serves a wide range of sectors, including automotive, IoT, telecom, industrial automation, and consumer electronics, delivering RoHS- and non-RoHS-compliant products that meet global quality and safety standards.

This recognition follows the company's strategic investments in advanced SMT lines, Industry 4.0 technologies, and enhanced testing infrastructure at its Pune facility. These initiatives have significantly improved throughput, traceability, and quality control for high-mix, high-volume production.

With certifications including ISO 9001, IATF 16949, and ISO 13485, [inYantra](#) ensures every product manufactured aligns with stringent regulatory and industry-specific requirements. The company's robust process control, engineering expertise, and customer-first approach have positioned it as a go-to contract manufacturing partner for companies across India, Europe, and the Americas.

As the demand for electronics continues to rise, inYantra remains focused on sustainability, operational excellence, and future-ready manufacturing—empowering businesses with reliable, cost-effective solutions tailored to their specific needs.
