

James Olsen: Chief Flight Medic and Owner of Air Medical Escorts, LLC

Transforming Patient Transport with Professional Medical Escort Services

New York City, New York Aug 17, 2025 ([Issuewire.com](https://www.issuewire.com)) - James Olsen, a seasoned paramedic with extensive experience in emergency medical services, founded Air Medical Escorts, LLC in 2010 in Port St Lucie, Florida. Recognizing the need for more economical solutions for patient transport, particularly for those who could benefit from commercial airline travel, Olsen has built a dedicated team to provide top-notch medical escort services, offering an innovative alternative to traditional air ambulance services.

Beginning his career as a paramedic with the Rostraver West Newton Ambulance Service in Southwest Pennsylvania, Olsen gained invaluable insight into the challenges faced during medical emergencies. His transition to fixed-wing air ambulances allowed him to observe firsthand the high costs associated with air medical transport. This experience motivated him to establish Air Medical Escorts, a company dedicated to delivering efficient and effective medical transport solutions tailored to patient needs.

Air Medical Escorts specializes in providing high-quality medical escort services for patients traveling on commercial airlines. With a team consisting of four paramedics, four registered nurses, and eight doctors, the company is well-equipped to ensure that patients receive the care they need throughout their journey. Patients are typically escorted in first or business class, where medical professionals offer essential services such as cardiac monitoring, medication administration, and continuous health assessments.

In addition to standard escort services, Air Medical Escorts addresses the needs of patients in challenging scenarios, including conflict zones. Here, ex-military medics are deployed to safely transport sick or injured individuals out of dangerous areas, ensuring their well-being in high-risk environments. This specialized service highlights the company's commitment to safety and excellence, regardless of the circumstances.

Moreover, Air Medical Escorts recognizes that not all patients require air travel. For long-distance transfers where flying is not an option, the company offers tailored ground transportation solutions, ensuring patients can reach their destinations comfortably and safely.

For travelers seeking leisure, Air Medical Escorts also provides vacation and cruise escort services, allowing seniors and individuals with health conditions to enjoy their journeys alongside loved ones. This service ensures that everyone can travel together safely, creating unforgettable memories without compromising health.

As Air Medical Escorts continues to grow, it remains dedicated to revolutionizing the medical transport industry by providing compassionate, reliable, and cost-effective services tailored to each patient's unique needs.
