

Marguerite F. Alexander, BSN, RN: A Leader in Nursing and Public Health Initiatives at the Maryland Department of Health

Dedicated to Advancing Community Health and Elevating Clinical Excellence

New York City, New York Aug 12, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Marguerite F. Alexander, BSN, RN, is making significant strides in public health as the Nurse Program Consultant - Lead Clinical Supervisor at the Navy Stadium Mass Vaccination site for the Maryland Department of Health. With an unwavering commitment to healthcare excellence and community service, Marguerite exemplifies the qualities of a dedicated nurse and leader.

Marguerite's academic journey began at the University of Maryland, Baltimore County, where she earned her Bachelor of Science in Nursing in 1989. Her educational foundation has served her well throughout nearly three decades of service in the nursing profession. In 2018, she further enhanced her credentials by completing the Registered Nursing/Registered Nurse renewal program at the University of Delaware, demonstrating her commitment to lifelong learning and professional development.

As an active member of Sigma Theta Tau, the international honor society of nursing, and Phi Kappa Phi, a multidisciplinary collegiate honor society, Marguerite has consistently shown her dedication to academic excellence and the advancement of the nursing profession. These affiliations not only highlight her achievements but also reflect her commitment to the values of leadership and scholarship within the healthcare community.

Throughout her career, Marguerite has made impactful contributions to medical research, co-authoring significant publications that have expanded knowledge in the field. Notably, she co-authored "Airway Hyperreactivity in Cystic Fibrosis," published in the CHEST Journal by the American College of Chest Physicians on August 1, 1988. This pivotal research has enhanced understanding of respiratory challenges faced by individuals with cystic fibrosis. Earlier that same year, she contributed to "Contrast Sensitivity in Age-Related Macular Degeneration," featured in JAMA Ophthalmology, underscoring her commitment to addressing critical issues in patient care and medical research.

In her current role at the Maryland Department of Health, Marguerite plays a vital part in the state's vaccination efforts, spearheading initiatives that protect public health and ensure community well-being. Her leadership and expertise are invaluable as Maryland continues to navigate the challenges posed by public health crises.

Marguerite F. Alexander stands as a testament to the power of nursing in shaping health outcomes and improving lives. Her dedication to education, research, and public health exemplifies the essence of nursing as a profession committed to service, innovation, and excellence.
