

New Chatbot Builder Launched on TelebuSocial: Create Paths, Test Flows, and Automate Replies 5x Faster

TelebuSocial Empowers Businesses with a No-Code WhatsApp Chatbot Builder That Delivers Instant Customer Engagement.

Hyderabad, Telangana Aug 10, 2025 ([IssueWire.com](https://www.issuewire.com)) - This new WhatsApp API chatbot builder is here to improve your marketing and customer support/engagement, and boost your ROI.

In a world where customers expect lightning-fast replies (even at midnight) businesses are scrambling to keep up. However, for most teams, technical roadblocks, unclear pricing, and developers who are “on it” but never truly committed, are stopping them from automating their WhatsApp replies.

[TelebuSocial](https://www.telebusocial.com) just flipped that script.

Say hello to its brand-new, NO-CODE **WhatsApp Chatbot Builder**.

This is not some overengineered, feature-cluttered puzzle. It’s a *visual chatbot builder* where even a non-techie can:

- Create powerful chat flows
- Test responses in real-time, and
- Launch customer journeys in minutes.

“We built this for the people who have big ideas but no patience for delays. Marketers, founders, solo-preneurs, even customer service experts who don’t want to be stuck answering ‘what’s your return policy?’ twenty times a day. TelebuSocial keeps you in charge.” said **Nisha**, CEO of Telebu.

What can you do with TelebuSocial's chatbot builder?

- Drag. Drop. Build the flow your customers need to see.
- Test how it feels *before* going live.
- Set up custom replies with text, buttons, images, or PDFs.
- Do it all in multiple languages, for every kind of customer.
- And most importantly: Connect it directly to your **WhatsApp Business API** via TelebuSocial.

This builder is designed to *scale with you*. Whether you're setting up a simple lead capture bot, a payment notification flow, or a 24/7 helpdesk, it's yours to customise.

No coding. No back-and-forth with your tech teams. No waiting.

"People want to move fast. They want to build things themselves. This builder puts the power back in their hands," Nisha added. "And we've made sure they don't need a Computer Science degree to use it."

Why is this good news?

More than **2 billion people** use WhatsApp globally.

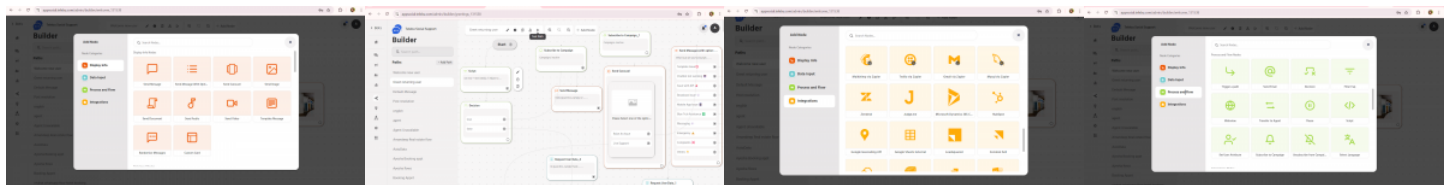

[According to Meta](#), 71% of users feel more connected to brands they can message and get help from quickly. But brands can't scale those conversations if every reply depends on human hands. Automation isn't optional anymore; it's *essential*.

[TelebuSocial's WhatsApp Chatbot Builder](#) arrives at exactly the right moment, removing the barrier between businesses and meaningful, automated customer experiences.

This WhatsApp API and automation platform serves businesses and organisations across India, the UAE, Bahrain and Qatar. From broadcasts to chatbots, TelebuSocial helps you grow faster, with messaging that works harder (and smarter).
