

Nicholas Ginex's New Literary Title Urging Public Awareness of Hidden Energy Technologies and Secret Government Programs

Lansing, Michigan Aug 22, 2025 ([Issuewire.com](https://www.issuewire.com)) - Nicholas Ginex, longtime researcher, author, and aerospace engineer, announces the release of his latest book, *Enjoy Free Energy and Life Throughout the Universe*. The book presents a controversial but deeply researched argument that advanced energy technologies, potentially capable of providing free energy to the world, have been deliberately hidden from public knowledge by covert government agencies operating beyond standard oversight.

In *Enjoy Free Energy and Life Throughout the Universe*, Ginex outlines a narrative that ties together decades of secret military operations, classified intelligence programs, and unexplained aerial phenomena. According to Ginex, the origins of these cover-ups trace back to the formation of the Central Intelligence Agency (CIA) in 1947. He contends the CIA was not simply established for national defense, but specifically in response to UFO sightings that intensified after the United States detonated atomic bombs over Japan in 1945.

Ginex's research alleges that between 1947 and 1948, CIA-linked military forces downed six UFOs near Roswell, New Mexico. Survivors from these events, he writes, were taken to underground facilities while their crafts' advanced technologies, especially free energy devices, were hidden from public use.

"These events changed the course of human development without the public's consent," says Ginex. "Free energy technology exists, yet for decades it's been suppressed to maintain global dependence on biofuels and nuclear power."

The book also highlights financial data showing billions of dollars funneled annually into National Intelligence and Military Intelligence Programs. Ginex emphasizes that these public figures don't include the vast sums covertly allocated to unauthorized top-secret projects, which he believes fund a secretive branch of the CIA he calls the "Hidden CIA."

Ginex asserts that the Hidden CIA has not only withheld technology but actively silenced scientists, engineers, and military officers through intimidation and even murder. His book presents these claims alongside references to government budget records and independent research.

Furthermore, Ginex voices support for the RICO lawsuit initiated by Dr. Steven Greer, aimed at holding CIA, Military Industrial Complex (MIC), and FBI leaders accountable for what he describes as decades of illegal activity. Ginex urges current U.S. leadership, particularly President Donald J. Trump, to address these issues directly and push for full disclosure during his administration.

“This isn’t just an American issue,” Ginex adds. “It’s about improving life on Earth for everyone. We have the opportunity to eliminate pollution, drastically lower energy costs, and even explore interplanetary travel — but only if we demand the truth.”

Ginex calls on both the American public and global citizens to unite, insisting that the potential of free energy belongs to humanity, not hidden agencies or corporate interests. He frames it as both a scientific breakthrough and a moral imperative.

Availability & Contact

Enjoy Free Energy and Life Throughout the Universe is now available in paperback and digital editions through major online retailers. For purchase, media inquiries, or speaking engagements with the author, visit:
