The advertisement features a stylized illustration of a server rack with glowing green lights. A man in a white shirt and red tie stands next to the server, holding a tablet and gesturing. An American flag is visible in the top right corner. The text 'Onlive Server' is in orange, and 'USA VPS Server Hosting' is in large, bold black letters. Below this, a paragraph describes the service: 'Boost your website's performance with USA VPS Server Hosting, offering secure, scalable solutions and reliable uptime for businesses targeting the US market.' Two bullet points with circular icons list 'Dedicated IP address' and 'High-performance hardware'. At the bottom left, there are social media icons for Twitter, Facebook, Instagram, and WhatsApp, followed by the handle '/onliveserver' and the website 'www.onliveserver.com'.

Ghaziabad, Uttar Pradesh Aug 22, 2025 (Issuewire.com) - **Onlive server**, a leader in bare metal, enterprise cloud, virtual servers, and colocation, today announced the launch of its new Fully-Managed [USA VPS Server Hosting](#) service. This powerful new offering is specifically designed for small and medium-sized businesses (SMBs) that are outgrowing their shared hosting plans and need more power and control, but don't have the technical team to manage a server on their own.

Our vps server hosting in usa is built from the ground up to deliver unparalleled speed and reliability. Each virtual private server leverages **pure SSD storage**, which provides up to 10x faster performance than traditional hard drives. This means websites and applications will load in the blink of an eye, providing an exceptional user experience that can improve everything from search engine rankings to conversion rates.

What truly sets this service apart is the "fully-managed" aspect. Businesses no longer have to worry about the complexities of server maintenance. Our team of expert technicians works around the clock to handle all the heavy lifting, including:

What Makes Onlive Server's USA VPS Hosting Stand Out?

- **24/7 Expert Support:** Get round-the-clock help from a team of experts, with a dedicated personal consultant available during business hours for your US-based VPS plan.

- **Maximum Security:** Our servers are built with your peace of mind in mind. We use ISO 27001-certified data centers, SSL encryption, firewall management to protect you from attacks, and DDoS protection to ensure your data stays safe and secure.
- **Fast SSD NVMe Storage:** Benefit from the latest cloud hardware with our state-of-the-art SSD NVMe storage. It's faster and more efficient than traditional hard drives, giving your US VPS a performance boost.
- **Root Access:** Take complete control of your US VPS with full root access. This allows you to install applications, change files, and customize the server to fit all of your project requirements.
- **Unlimited Traffic:** Don't worry about traffic or bandwidth restrictions on your US VPS. With no surprise overage fees, you have the freedom to grow.
- **Popular Payment Options:** We make it easy to buy your US-based VPS by offering a variety of payment methods, including Mastercard, Visa, PayPal, Discover, and Crypto, so you can choose what works best for you.
- **Automated backups:** Your data is automatically backed up, so you can rest easy knowing it's safe.
- **Instant Snapshots:** Our snapshots feature lets you save your server's state before making changes, making it easy to roll back to a previous version if needed.
- **Control Panel:** Our Web UI is designed for easy server management, giving you simple and powerful control over your cloud environment.
- **Flexible Networking:** Each server comes with dedicated IPv4 and IPv6 addresses. You can also add more IPs and set up virtual private networks for unlimited internal traffic.

USA VPS Hosting Plans & Price

USA VPS X:

This option offers 1 CPU core, 1 GB RAM, and 30 GB SSD storage. Bandwidth is set at 1 TB, and it comes with 1 IP. The data center is in Missouri, USA, supporting both Windows and Linux. Monthly cost: \$11.00.

USA VPS Y:

This option ups the resources to 2 CPU cores and 2 GB RAM, with 60 GB SSD storage. Bandwidth increases to 2 TB, with 1 IP address included. It is based in Missouri, USA, and supports Windows or Linux OS. The monthly price is \$17.00.

USA VPS Z:

The most powerful plan provides 4 CPU cores, 4 GB RAM, and a 120 GB SSD hard disk. It comes with 4 TB bandwidth and 1 IP address, hosted in Missouri, USA, running either Windows or Linux. The monthly cost is \$32.00.

Which VPS Hosting Solution Is Best for Your Business: Linux or Windows

Linux VPS Hosting

Linux VPS hosting is an excellent choice for businesses and developers seeking a robust, secure, and affordable hosting environment. It provides complete root access, giving you full control to customize your server to your exact specifications. This type of hosting is highly valued for its performance, scalability, and security, making it well-suited for a wide range of tasks, including running websites, applications, and databases.

Windows VPS Hosting

Windows VPS hosting is the go-to option for companies that depend on Microsoft-specific applications such as Exchange or SQL Server. It offers a familiar user experience with the Windows operating system's graphical interface, making it easy for those already comfortable with the platform. Windows VPS hosting also guarantees dedicated resources for optimal performance and includes strong security measures to protect your Windows-based applications.

CEO Perspective

We believe that every business, regardless of size, deserves access to high-performance hosting without the headache," said **Naveen Rajput CEO of Onlive Server**. "Our new Fully-Managed USA VPS Hosting service fulfills that promise. We're removing the technical barrier so that our customers can focus on what they do best: growing their business. This service isn't just about providing a server; it's about providing peace of mind and a platform for success.
