

pdfAssistant Launches Workflows and Batch Processing: Powerful PDF Automation Made Simple

AI-powered platform introduces repeatable multi-step automation and bulk execution for faster, smarter document management

Chicago, Illinois Aug 20, 2025 ([Issuewire.com](https://www.issuewire.com)) - pdfAssistant, the intelligent AI-powered assistant for no-code PDF automation, announced the release of its new [PDF Workflows and Batch Processing capabilities](#). With these powerful features, users can automate complex multi-step PDF tasks and apply them across hundreds or thousands of documents, dramatically reducing manual work and transforming document operations at scale.

Workflows allow users to automate repetitive tasks such as [converting](#), [compressing](#), [watermarking](#), and securing documents simply by describing the process in plain language. Batch Processing extends this power even further by enabling users to upload entire folders of files and apply saved Workflows to all of them at once. Together, these capabilities deliver a repeatable, scalable, and highly efficient solution for document-heavy workflows.

“Teams across industries struggle with time-consuming PDF processes that eat into productivity,” said Eric Shore, Chief Innovation Officer at pdfRest. “With Workflows and Batch Processing, pdfAssistant empowers users to move from isolated actions to fully automated systems without requiring technical skills or engineering support. This release makes it possible for marketing teams, operations groups, researchers, and beyond to achieve enterprise-level efficiency in minutes.”

Key benefits of Workflows and Batch Processing include:

- **Repeatable Precision:** Build once and reuse, eliminating repetitive manual steps.
- **Bulk File Execution:** Apply the same process across large collections of documents in minutes.
- **Enterprise-Level Security:** Files are encrypted both in-transit and at rest and automatically deleted after a 24 hour retention period for maximum security.
- **AI-Powered Simplicity:** Just describe the task in plain language—no training or coding required.
- **Significant Time Savings:** Reduce hours of manual work into a fraction of the time.

Workflows and Batch Processing are now available to all pdfAssistant users. Sign up with your email to try the Starter plan for free and begin automating your most time-consuming PDF tasks today.

About pdfAssistant

pdfAssistant, by Datalogics, is an AI-powered PDF automation platform that makes it easy to create, process, and gain insights from documents using natural language. From chat-based commands to powerful multi-step workflows and batch automation, pdfAssistant transforms how individuals and teams work with PDFs without requiring training or technical skills. Designed for flexibility and scale, pdfAssistant integrates into any document-heavy workflow and accelerates productivity across

industries.
