

PlusX Electric Launches Rapid EV Roadside Assistance Service in Dubai

Dubai, United Arab Emirates Aug 11, 2025 ([IssueWire.com](https://www.issuewire.com)) - PlusX Electric, a leading sustainable mobility solutions provider in Dubai, has launched a groundbreaking Emergency EV Roadside Assistance Service to address one of the most pressing issues faced by electric vehicle (EV) owners — unexpected battery drain.

With EV adoption growing rapidly across the UAE, more residents and businesses are making the switch to clean mobility. However, the charging infrastructure has yet to fully meet demand, leading to range anxiety and instances where EV owners are stranded with no nearby charging point.

The new service from PlusX Electric allows users to request roadside help directly through the PlusX Electric mobile app. Within one hour, a trained assistance team arrives at the customer's location, equipped to deliver an on-the-spot battery top-up or provide a jump-start service for a completely drained battery — all without the need for towing.

“As EV adoption rises, the infrastructure to support these vehicles is still limited in Dubai,” said Mr. Chintan, CEO of PlusX Electric. “We’ve seen EV users facing the challenge of their batteries draining unexpectedly, often in inconvenient or isolated locations. Our new roadside assistance service ensures they get the help they need quickly, restoring peace of mind for every EV driver.”

Key Features of the Service:

Request help instantly via the PlusX Electric mobile app

Guaranteed arrival within 60 minutes across Dubai

Battery top-up and jump-start services available

Suitable for both private EV owners and fleet operators

Eco-friendly, no-towing-required solution

In addition to roadside assistance, PlusX Electric offers EV charger installations for homes, offices, and commercial properties, as well as on-demand doorstep charging services. With a commitment to advancing sustainable transportation in Dubai, the company continues to introduce innovative solutions to support EV adoption.

About PlusX Electric:

Based in Dubai, PlusX Electric is a new-age sustainable mobility company dedicated to delivering innovative electric vehicle charging solutions. From charger installations to emergency roadside assistance, PlusX Electric helps both individuals and businesses transition smoothly to electric mobility, promoting a cleaner and greener future for the UAE.
