

Positive Nucot Reviews Reflect Excellence in Software Testing and Gen AI Training

Nucot is led by Founder Ms. Sandeep supported by an experienced leadership team including the CEO, Training Director, and Placement Head. collective vision and industry expertise drive mission to deliver quality IT training and job placement support.

NUCOT REVIEW

I had joined NUCOT primarily for the relevant training in Data Analytics required to clear the hiring rounds of companies and NUCOT's placement assistance. The content, material provided by Sirisha ma'am was top-notch: Concise, to the point and yet with useful information. She was very patient, punctual and also guided us in preparing perfect resumes along with providing key tips on every topic. There was a lot of focus on problem-solving especially in SQL, which was great. So far, the delivery has been very satisfactory. Post completion of the training, I am currently in the placement process. Hopefully, everything goes well, and I can get placed as a Data Analyst. Will provide further feedback on placement support as well

NUCOT REVIEW

NUCOT has provided me with strong training and career guidance, enabling me to gain valuable hands-on experience. Rashmi Ma'am played a key role throughout the training period, making concepts easy to understand with her clear and effective teaching. The practical approach of the training helped me far more than theoretical knowledge, allowing me to understand the platform with ease. I gained in-depth knowledge of Power BI, data visualization, and Python, and the supportive staff at NUCOT were always ready to clarify my queries and guide me. I look forward to seeing how this training will help me secure a good job, and I am confident that the staff will fulfill their promise of helping me get placed in a reputable company.

NUCOT REVIEW

I had a great experience with NUCOT's online Software Testing course.

The training was easy to understand, very practical, and matched what companies look for today. The mentor was very patient and explained every topic clearly, with real-time examples.

The best part was the placement support. The team helped us a lot by scheduling interviews and guiding us at every step.

Because of their support, I now feel confident and ready to start my career in the IT industry. Thank you, NUCOT, for helping me build a strong foundation!
