

Punky Tiger Labs' 30 Blockchain + AI Patents Target the \$4.2 Trillion Global Counterfeiting Market

Tech company backed by 30 unique patents develops blockchain and AI-based trust structure to create an unbreakable global standard for document and product authentication.

DC, Washington Aug 20, 2025 ([Issuewire.com](https://www.issuewire.com)) - Punky Tiger Labs, a technology company specializing in anti-counterfeiting solutions, announced today that it has developed a patent-backed trust structure that could transform the global fight against forgery and piracy. With a portfolio of **30 unique patents in blockchain, artificial intelligence, and cryptography**, the company positions itself as a frontrunner in tackling the **\$4.2 trillion global counterfeiting crisis**.

Building the Future of Authentication

Punky Tiger Labs' methodology combines **secret codes, blockchain technology, and AI** into a single integrated framework capable of securing the authenticity and traceability of products and documents. Applications range from **contracts and certificates** to **sneakers, pharmaceuticals, and luxury goods**.

"Counterfeiting destroys trust in markets, governments, and even life-saving medicines. Our mission is to rebuild that trust with patented technology that cannot be faked," said **Álvaro López Zúñiga**, Founder & CEO of Punky Tiger Labs.

Patents as a Strategic Foundation

The company's **30 registered patents** provide more than legal protection — they establish a **technological moat and barrier to entry** that positions Punky Tiger Labs as a global leader in blockchain- and AI-powered authentication. This intellectual property strategy secures the company's innovations and gives partners and investors a unique opportunity to be part of a defensible and scalable market solution.

Proven Feasibility, Next Step: Certification

Initial trials have validated the **methodology's infallibility in detecting counterfeits**. Building on this foundation, Punky Tiger Labs is now focused on developing a **certifiable commercial version** of its platform, designed for adoption by **governments, notaries, and corporations worldwide**.

Investment and Strategic Partnerships

As it prepares to scale, Punky Tiger Labs is actively engaging with **strategic partners and forward-looking investors** who want to participate in building the **next global standard of authentication** — one that merges blockchain, AI, and patented innovation.

About Punky Tiger Labs

Punky Tiger Labs is a technology company founded by Chilean engineer and inventor **Álvaro López Zúñiga**. With a portfolio of 30 unique patents covering blockchain, artificial intelligence, and phygital trust systems, the company is pioneering solutions to eliminate counterfeiting, cloning, and piracy on a global scale.
