

Radiant Women's Health Celebrates New Menlo Park Office with Launch Party Event

Menlo Park, California Dec 27, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Radiant Women's Health, a boutique concierge clinic specializing in menopause care and gynecology for midlife women, will host an **invite-only launch party** to celebrate the opening of its flagship location.

Headed by **Dr. Jessica Kassis**, a Stanford-trained OB-GYN and certified menopause practitioner, Radiant Women's Health was created to meet the growing need for personalized, science-backed care for women navigating perimenopause, menopause, and healthy aging.

The event will bring together local physicians, community members, and women's health advocates for light bites, drinks, and meaningful conversations about the future of midlife care. Each room will feature a different theme in women's health, from hands-on wellness demos to interactive exhibits. Though not open to the public, the event marks a milestone in women's healthcare in the Bay Area and reflects a growing shift toward relationship-based, multidisciplinary support for this underserved stage of life.

"Women navigating menopause deserve more than rushed appointments and piecemeal care," says Dr. Kassis. "At Radiant, we've created a one-stop destination where women feel heard, respected, and supported at every step of their health journey."

With Radiant's Comprehensive Health Membership, patients have ongoing access to a dedicated team of evidence-based specialists—including a board-certified gynecologist, pelvic floor therapist, dietitian, endocrinologist, and care coordinator—who treat menopause as a multidimensional health issue, not a niche symptom.

À la carte gynecology services are also available for those who prefer episodic visits. The clinic operates on a self-pay model and provides superbills for insurance reimbursement, ensuring transparency and flexibility.

The new office blends evidence-based medical care with a seamless, hospitality-inspired experience. Patients can expect longer appointment times, direct access to clinicians, and personalized health plans rooted in the latest clinical research.

About Radiant Women's Health

Radiant Women's Health is a boutique gynecology and menopause clinic in Menlo Park serving women across the Bay Area. Headed by Dr. Jessica Kassis, our concierge model provides high-touch, expert-led care through a multidisciplinary team. We specialize in perimenopause, hormone therapy, pelvic floor therapy, and preventative health for women 40–65. Our Comprehensive Health Membership offers a one-stop approach to midlife wellness, with à la carte visits also available. At Radiant, care is personal, science-driven, and built around your long-term health.
