

## Songnetic Music a Music Publishing Company & Label Reimagined with Ai vocals & equity offering

**Toronto, Ontario Aug 6, 2025 ([IssueWire.com](https://www.IssueWire.com))** - Introducing Songnetic Music: A Music Publishing Company & Label Reimagining AI, Songwriting, and Producer-Led Ecosystems

A powerful new force has entered the music industry with a clear vision: empower creators, not replace them. Introducing Songnetic Music, the trailblazing music publishing and label venture from music-tech

innovator Nadeem Mughal (professionally known as MUGHAL). Once on the same management roster as Grammy-winning producer D'Mile during their early careers, and the architect behind the audio ad technology that helped lay the foundation for self-serve audio ad ecosystems within DSPs.

With Songnetic, Mughal returns to music to launch a creator-first ecosystem that fuses original songwriting, production, and AI vocals—while also laying the foundation for a franchise-ready model that other producers and songwriters can build upon as Songnetic expands and pioneer's the equity offering and ai vocal referencing space.

"This isn't just about releasing songs," says Mughal. "We're proving that producers can build their own publishing systems, their own IP monetization engines, and their own platforms, without needing the traditional gatekeepers and without undermining music authenticity in today's technology worlds."

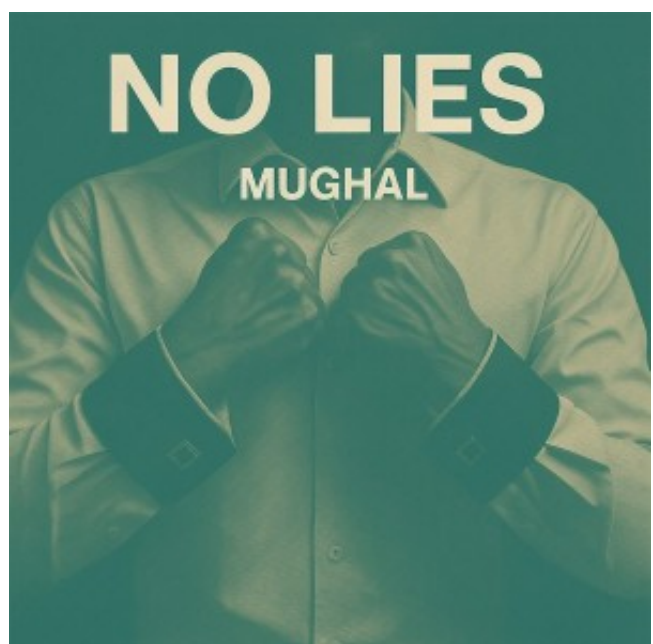

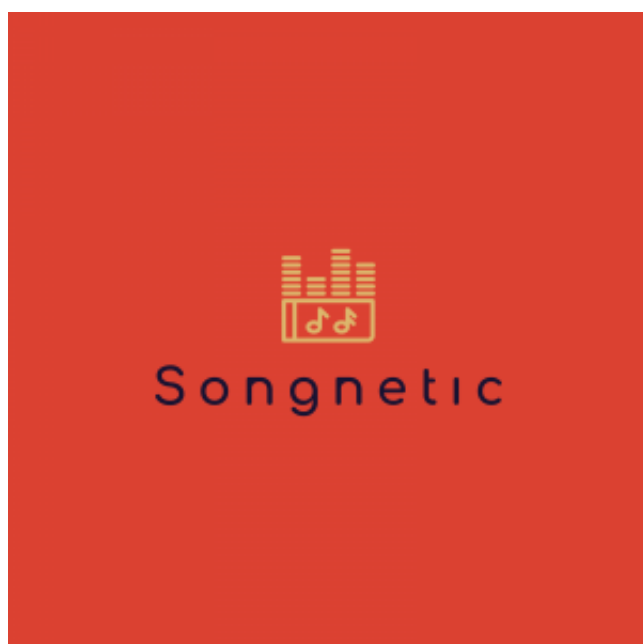

### Original Music First — AI as a Tool, Not a Replacement

Each Songnetic release starts with **original compositions, lyrics, and full signature original music production by Mughal**. AI is used **only** to render demo vocals, serving as reference points for real artists, brand clients, and direct-to-fan releases.

This model opens up new creative lanes while keeping human musicians at the center. The goal is to **help artists visualize the full song potential**, not to bypass them.

"We're using AI vocals the way filmmakers use storyboards — as a tool to bring the full creative vision to life," explains Mughal. "They help showcase my original production and songwriting, guiding how tracks can evolve. The goal is to spark real artist collaborations as songs build momentum. In the end, it's still real voices that win."
