

# The Lighting Quotient Unveils artZi: A Revolutionary Linear Adjustable Portrait Luminaire

West Haven, Connecticut Aug 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - [The Lighting Quotient](#), a global leader in innovative lighting solutions, is thrilled to announce the launch of [artZi](#), a state-of-the-art Linear Adjustable Portrait Luminaire designed to transform the illumination of artwork and gallery spaces. Engineered for versatility, performance, and elegance, [artZi](#) sets a new standard for lighting artwork and gallery spaces.

[artZi](#) offers an array of customizable configurations to suit diverse mounting conditions and aesthetic preferences. Sleek, adjustable hub hangers and built-in glare shielding features, including an optional baffle and gradient backsplash reduction film, ensure optimal light control and visual comfort. artZi delivers exceptional illumination, crafted with meticulous attention to detail, evenly lighting any vertical surface from top to bottom through its precisely extruded acrylic lens.

## Key Features of artZi:

**Flexible Configurations:** Available in multiple mounting options (D-mount, L-mount, R-mount, T-mount, and custom setups). Lengths ranging from 4 inches to 6 feet, accommodating various installation needs.

**High Performance:** Offers low (3.3 watts/ft), standard (6.5 watts/ft), and high (13 watts/ft) output options.

**Color Versatility:** Choose from static white (2200K, 2700K, 3000K, 3500K), Dim-to-Warm (1800K-3000K) and, Tunable White (2700K-6500K) for dynamic lighting effects.

**Advanced Dimming:** Compatible with multiple dimming protocols, including 0-10V, DALI, DMX, and Casambi wireless, with dimming ranges from 100% to as low as 0.1%.

**Elegant Finishes:** Available in a range of sophisticated finishes, including Champagne, Platinum Gold, Vista Black, and Clear Vision (chrome), among others.

**Made in the USA:** Union-made at The Lighting Quotient's facility in West Haven, Connecticut, ensuring superior craftsmanship and quality.

Lana Nathe, Founder and Principal Designer at Light Insight Design Studio Inc. in Boston, faced a unique lighting challenge at the Harvard Alumni Club. Tasked with illuminating a nine-foot painting, she initially considered ceiling-mounted or direct wall-mounted lighting solutions. However, architectural limitations made both options unfeasible. The only available resource was an existing wall outlet box equipped with a standard switch—right where innovation had to begin.

"Light reveals shape, surface and color, it informs our individual perception and provides us a common language of light- art thrives on this to be seen in its truest form. Great lighting should integrate - and not distract with hot spots & scallops," said Lana Nathe.

Lana Nathe specifically partnered with The Lighting Quotient to develop this custom lighting solution, drawn by the company's reputation for delivering exceptional uniform wall-wash performance. Unlike conventional art lights that offer a standard 180-degree distribution — often illuminating only the top portion of a piece — The Lighting Quotient's **artZi** fixture ensures even, full-surface illumination that brings out the true color and texture of the artwork. **artZi** seamlessly blends form and function, offering energy efficiency, easy installation, and a lockable aiming mechanism for precise light placement—making it an ideal choice for galleries, museums, and high-end residential or commercial

environments.

“We saw a need to replace current art lighting that cause glare, hotspots, and uneven illumination to meet the unique demands of illuminating art. **artZi** empowers designers and curators, by adding light to art in a way that allows the viewer an unmatched visual experience,” said Allie Schieffelin, CEO, at The Lighting Quotient.

For more information about **artZi** or to request a quote, contact The Lighting Quotient at [sales@thelightingquotient.com](mailto:sales@thelightingquotient.com) or call 203-931-4455.
