

Viktoria Nedelcheva Empowers Over 44,000 Students Worldwide with Online Accounting Courses on Alison

Viktoria Nedelcheva: Helping Self-Employed Professionals Streamline Bookkeeping and Boost Financial Confidence

Stamford, US Aug 8, 2025 ([Issuewire.com](https://www.issuewire.com)) - **Viktoria Nedelcheva**, a seasoned bookkeeping expert and online educator, is transforming the way freelancers and sole proprietors manage their finances. Through her popular Alison course, QuickBooks Bookkeeping Software for Freelancers and Sole Proprietors, Viktoria equips independent professionals with the tools, knowledge, and confidence to

take control of their bookkeeping and tax preparation.

With years of hands-on experience supporting freelancers, entrepreneurs, and small business owners, Viktoria understands the unique financial challenges self-employed individuals face — from irregular income and tax complexities to tracking deductible expenses. Her practical, step-by-step teaching style eliminates the overwhelm, making it easier for professionals to adopt modern, automated bookkeeping systems.

At the core of her training is **QuickBooks Self-Employed**, Intuit's cloud-based accounting software designed for the needs of independent professionals. The platform allows users to import bank and credit card transactions automatically, categorize expenses with one click, and generate real-time financial insights. It also features mileage tracking, quarterly tax estimation, and seamless TurboTax integration, making tax season less stressful and more accurate.

"Many freelancers start with spreadsheets, but quickly discover that manual tracking can be time-consuming and prone to errors," Viktoria explains. "QuickBooks Self-Employed automates those tasks, freeing up time for clients to focus on their craft while staying financially organized."

Her free Alison course guides learners through every step of using the software — from setting up accounts and creating invoices to reconciling transactions and generating financial reports. With over 44,000 students already enrolled in her courses, Viktoria has built a strong reputation for helping self-employed professionals gain control over their business finances.

Whether participants are just starting their freelance journey or have been self-employed for years, Viktoria's training ensures they walk away with a clear system for managing income, expenses, deductions, and taxes — all with greater accuracy and less stress.
