

Zement Brings a New Light with Their Single 'Soil'

One of the most promising experimental rock duos, Zement', is here with their single 'Soil'. The enchanting track is now streaming on Spotify.

Nuremberg, Aug 22, 2025 ([IssueWire.com](https://www.issuewire.com)) - Reinventing sound with every other release is something that makes a musician unique in the industry, and that is what makes **Zement** different from the others. This is an experimental rock duo that proves its ability to craft music that moves beyond boundaries with the single '[Soil](#)'. The band is made up of Philipp Hager and Christian Büdel, who are revolutionizing the rock industry by finding new ways to elevate the genre to the next level. This is profoundly visible in the new track, where the duo has blended raw textures with hypnotic grooves. With this, the duo has also brought together the grit of noise rock and the pulse of electronic rhythm.

From the very first note, '**Soil**' carries an organic flow that instantly pulls the listeners in. The composition is unique, where the musical duo has layered riffs and synth elements. With the percussive elements, the band made the song into a swirling soundscape. The balance between structured songwriting and free improvisation is perfectly captured in the track, making it a memorable listening experience for the band's audience. Each section of the song brings a new transformation, almost similar to the shifting ground that the title suggests.

What makes the song stand out is the way it reflects **Zement's** vision, mirroring the loose narrative spirit of their album 'Passagen'. Here, the instruments and lyrical ideas intertwine to create something lasting, something beautiful, and that is exactly what the single brings to the table. You can listen to the song along with some of the band's releases like '[Move/Procession](#)', 'Back to My Looping Cave', 'Making a Living (I Don't Know What I Want, but I Know How to Get It)', 'Station to Station', etc. The entire discography of the duo is available on Spotify, and you can get more details on [Facebook](#) and [Instagram](#).
