

Amven Nutrition Introduces 7 Vertical Model to Help Fitness Coaches Monetize Audiences

Amven Nutrition combines white-label supplements, dropshipping, Amazon KDP integration, and AI software to help coaches diversify income streams

Columbus, Ohio Sep 12, 2025 ([Issuewire.com](https://www.issuewire.com)) - Amven Nutrition LLC, a U.S.-based health and fitness solutions company, has announced the launch of a comprehensive platform designed to help personal trainers and fitness influencers create and scale their own brands.

The initiative addresses one of the main challenges in the fitness industry: monetizing audiences beyond traditional coaching sessions. By combining white-label supplement manufacturing, e-commerce tools, and digital solutions, Amven Nutrition offers trainers a pathway to transform their expertise into sustainable businesses.

Through the platform, trainers can launch custom supplement lines with no minimum order requirements, access white-label wellness products, and sell directly through an integrated online marketplace. In addition, Amven Nutrition provides dropshipping services, Amazon KDP integration for

publishing books and guides, and client management software supported by AI-powered calculators for nutrition and fitness planning.

“Our goal is to empower trainers to expand their influence and create long-term value,” said a spokesperson for Amven Nutrition. “With seven verticals, from supplements to digital products, we are helping fitness professionals diversify their income and build brands that reflect their vision.”

The company emphasizes that its model is designed for scalability and accessibility. Trainers do not need upfront investment in inventory or complex logistics, as fulfillment is managed directly through Amven’s network of partners.

Amven Nutrition LLC is headquartered in the United States and continues to expand its partnerships with fitness professionals across North America and Latin America.
