

Appsmith Empowers Developers to Build an App with AI — Faster, Smarter, and Securely

The Appsmith logo is displayed in a large, bold, black sans-serif font. The word "appsmith" is followed by a small orange horizontal bar and a small green square, which are part of the brand's visual identity. The logo is centered on a light blue background that features a subtle, repeating pattern of faint, overlapping circles.

Avondale, Arizona Sep 20, 2025 ([Issuewire.com](https://www.issuewire.com)) - Appsmith, the leading open-source low-code platform, today announced powerful new capabilities that make it easier than ever for teams to **build an app with AI**. By blending AI-driven actions with Appsmith's flexible low-code tools, developers and enterprises can accelerate application delivery, improve productivity, and reduce costs—without compromising on security or control.

Build Apps with AI That Truly Work for Your Business

Appsmith provides everything modern teams need to create intelligent applications at scale:

- **Seamless AI integration** – Connect custom large language models (LLMs), APIs, databases, or use built-in AI actions to enhance apps with natural-language prompts and smart automations.
- **Low-code + full-code flexibility** – Drag-and-drop UI widgets, generate components with natural-language prompts, or customize deeply with JavaScript, HTML, and CSS.
- **Enterprise-ready security** – Role-based access control, audit logging, SAML and OIDC authentication, plus self-hosting options (including air-gapped environments) ensure safe deployment.

- **Developer-first workflows** – Git integration for branching, PR reviews, and multi-environment deployments simplifies version control and long-term maintenance.

Proven Results Across Industries

Global enterprises are already realizing value with Appsmith's AI-enabled platform:

- **GSK** accelerated Linux server patching across thousands of systems in just one sprint.
- **HeyJobs** boosted campaign management efficiency by 90% through faster feature delivery.
- **Block** cut manual application processing time in half with custom automated workflows.

Commitment to Open Source and Accessibility

Appsmith remains fully open source under the Apache 2.0 license, offering a free Community Edition alongside enterprise features for advanced security and scalability. With a transparent roadmap and an active developer community, Appsmith ensures every organization can build apps with AI—faster, smarter, and without vendor lock-in.

Availability

Appsmith is available today at www.appsmith.com. Developers can get started for free, explore templates for dashboards, customer support portals, and internal tools, and begin building apps powered by AI in minutes.

About Appsmith

Appsmith is the world's leading open-source low-code platform, trusted by thousands of teams to rapidly build custom internal tools, dashboards, and workflows. Designed for developers, Appsmith combines drag-and-drop simplicity with the power of full-stack coding and seamless AI integration. Headquartered in San Francisco, Appsmith is backed by global investors and supported by an active open-source community.
