

Brisbane College of Horticulture Launches Expanded Courses and Stronger Student Support

Nationally Accredited Education Provider Launches Enhanced Horticulture, Business, and IT Programs with Industry-Focused Training and Comprehensive Support for Domestic and International Students

Brisbane College of Horticulture

Brisbane, Queensland Sep 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - Brisbane College of Horticulture Announces Expanded Course Offerings and Enhanced Student Support Across Queensland & NSW

Brisbane College of Horticulture (BCH), a leading nationally accredited provider of vocational education, is reaffirming its commitment to excellence by expanding its course portfolio and enriching student support services across its campuses in Brisbane, Cairns, and Coffs Harbour.

In response to growing demand in the horticulture, agribusiness, business management, and information technology sectors, BCH is pleased to offer a suite of updated and enhanced programs designed to give students the skills and confidence to thrive in their careers.

New and Enhanced Programs

BCH already delivers a robust selection of courses in horticulture, business, and IT, but is now intensifying its educational impact by introducing new learning modules, upgrading facilities, and forging stronger industry partnerships.

- **Horticulture & Agribusiness:** Courses such as *Certificate III and IV in Horticulture*, *Diploma of Horticulture Management*, and *Diploma of Agribusiness Management* are being expanded with greater hands-on components, updated curriculum to reflect sustainability practices, modern greenhouse techniques, and integration of digital tools for farm and landscape

management.

- **Business & Leadership:** The *Diploma of Leadership & Management* and the *Advanced Diploma of Business* are being enhanced with case-study based learning, more frequent guest lectures by industry leaders, and opportunities for students to undertake real business projects.
- **Information Technology:** BCH's *Advanced Diploma of Information Technology (ICT60220)* is designed to address the needs of the evolving tech sector, with core emphasis on cybersecurity, cloud computing, system administration, and emerging digital tools.

Strong Student Support & Accessibility

Recognising that student success depends on more than just classroom instruction, BCH is committed to providing a full spectrum of support services:

- **Orientation & Learning Support:** New students receive thorough orientation, guidance in literacy, numeracy, and language skills, and access to ongoing tutoring and mentorship.
- **Domestic & International Admissions Assistance:** BCH is welcoming applications from across Australia and overseas. For international students, BCH's CRICOS registration ensures full compliance with national and international standards. For domestic learners, support is provided through clear fee structures, refund policies, and recognition of prior learning.
- **Career Pathways & Industry Connections:** BCH works closely with sector partners in horticulture, agribusiness, business, and IT to facilitate work placements, internships, and project-based learning. These efforts bridge the gap between education and employment, increasing graduates' job readiness.

Multiple Campuses, One Vision

With campuses in **Brisbane, Cairns, and Coffs Harbour**, BCH combines regional diversity with consistent quality. All locations are equipped with modern labs, greenhouses, technology resources, and experienced educators who bring both industry and academic expertise to the classroom.

"Our vision is simple: to deliver education that's nationally accredited, practically grounded, and career-focused,". "Whether you're studying horticulture under the tropical skies of Cairns, business management in Brisbane's urban center, or IT in the vibrant community of Coffs Harbour, our aim is to ensure every student has the tools they need to succeed."

Outcomes That Matter

Graduates of BCH leave with skills that employers value. In horticulture and agribusiness, that might mean greenhouse operations, landscape management, or sustainable farm practices. In business and leadership, it could be roles in team management, operations, or small business ownership. In IT, graduates are prepared for increasingly in-demand technical roles.

Moreover, BCH's focus on nationally recognised credentials ensures that students hold qualifications that are valid and respected across Australia, and that meet industry benchmarks.

Why BCH Stands Out

- **National Accreditation and Recognition:** All courses are nationally accredited and regularly updated to align with industry needs.
- **Outstanding Trainers & Educators:** BCH's educators combine real-world experience with teaching skill, ensuring students learn current best practices.
- **Hands-on Learning:** Whether in labs, greenhouses, or via live projects, learning at BCH is deeply experiential.
- **Supportive Student Environment:** Student well-being and learning are central to BCH's approach. From personal counseling to academic help, students are supported throughout their journey.
- **Flexible Study Options & Clear Pathways:** Recognition of prior learning, transparent admissions processes, and pathways from certificates to diploma levels mean students can tailor their educational journey.

Join BCH and Grow Your Future

Applications for the upcoming semesters are now open for both **domestic and international students**. With strong enrolment support, flexible course options, and campuses in Brisbane, Cairns, and Coffs Harbour, BCH is an excellent choice for anyone looking to build or elevate a career in horticulture, business, or IT.
