

Cozaint Launches ALICE1: The First Affordable “Infinite” Video Storage System For Long-Term Surveillance Retention

Breakthrough LTO-powered solution cuts surveillance storage costs by up to 70% while ensuring decades of high-resolution video retention.

San Diego, California Sep 22, 2025 ([Issuewire.com](https://www.issuewire.com)) - Cozaint, a leader in innovative video surveillance solutions, announces the launch of **ALICE1™**, the first self-contained video surveillance recording and storage system that provides businesses with decades of secure, affordable video retention. By leveraging the proven reliability of **Linear Tape Open (LTO) technology** with a cloud-based search platform, **ALICE1** makes it possible for organizations to store unlimited video footage at a fraction of the cost of traditional hard-drive solutions.

The Growing Storage Crisis

Surveillance cameras are recording in higher resolution than ever before, but the cost of retaining video

for the required time by regulators is skyrocketing. For industries such as cannabis, gaming, healthcare, and retail, failing to maintain long-term archives can result in fines, license loss, frivolous litigation, or compliance violations.

ALICE1 directly addresses this challenge with a simple, scalable approach –each LTO8 tape costs **under \$70**– can record petabytes of video, and last up to **30 years**. Businesses can finally record at the highest resolution, full frame rate, continuously without any additional compression and keep every second, indefinitely.

Transforming the Economics of Video Retention

- **Up to 70% cost savings** compared to expanding hard drive storage
- **30+ years of durability** per tape, creating a permanent archive of evidence
- **Scalable, pay-as-you-go growth** just add a new ~\$70 tape as needed
- **Centralized management** across multiple locations, ensuring compliance and operational efficiency

With **ALICE1**, multi-location businesses can record video locally, send tapes securely to a central archive, and quickly retrieve footage using Cozaint's **intuitive cloud-based search tool** with no manual hunting required.

Customer-Centered Innovation

"Businesses shouldn't have to choose between video quality and compliance," said **Jay Jason Bartlett, CEO of Cozaint**. "With **ALICE1**, we've eliminated the endless cycle of costly storage upgrades. For the first time, companies can affordably keep every second of video evidence—for years and years—without compromise."

Industry analysts and early evaluations advocate that ALICE1 can deliver dramatic reductions in storage costs while helping organizations feel confident in meeting strict regulatory mandates. In sectors such as cannabis and healthcare -where video retention requirements are both lengthy and costly- ALICE1 is designed to cut expenses by more than half and simplify compliance by making footage retrieval timely.

A New Standard for Video Surveillance Storage

ALICE1 isn't just about cost: it's about compliance, confidence, and peace of mind.

- **Cannabis businesses** can easily meet strict multi-year retention requirements.
- **Casinos** can protect against fraud and disputes with decades of footage.
- **Healthcare facilities** can secure patient safety video for as long as required by law.
- **Retailers** can maintain continuous, high-resolution footage to combat shrinkage.
- **Businesses** can combat relentless litigation from false claims -such as slip and falls- by providing unlimited useable video evidence, not just the typical industry 30-days of highly compressed video

By making long-term storage affordable and accessible, **ALICE1** sets a new benchmark for how organizations approach video evidence retention.

Availability

The ALICE1 system is available immediately. Businesses can learn more, request a demo, or speak with a Cozaint representative at www.cozaint.com/ALICE1.

About Cozaint Corporation:

Founded in 2018, Cozaint delivers intelligent surveillance solutions that empower organizations to harness the full potential of their physical security infrastructure. When you need leading edge physical security solutions, lean on Cozaint. Learn more at www.Cozaint.com Cozaint and the Cozaint logo are registered trademarks of Cozaint Corporation.
