

DIGICODE LAUNCHES DiGER: A NEXT-GENERATION All-in-One Platform iGaming Platform

Plano, Texas Sep 23, 2025 ([IssueWire.com](https://www.issuewire.com)) - International software provider [Digicode](#) has officially launched [DiGER](#), its iGaming platform built to give operators and game publishers unprecedented ownership, flexibility, and transparency.

DiGER is offered under a one-time licensing model. This unique approach allows operators to take full control of their backend systems, reduce long-term costs, and gain the freedom to scale and customize their platforms according to business and regulatory needs.

A Platform Built for Performance, Compliance & Scale

At the core of DiGER is a **modern framework** designed for high performance and adaptability. Operators can quickly configure, deploy, and expand their platforms, whether managing a single brand, launching a multi-brand strategy, or operating white-label networks.

Key capabilities of DiGER include:

- **Modular Microservice Architecture** – Flexible components such as PAM, bonus engines, wallets, and reporting tools for agile scaling.
- **Unified Integration Layer** – Pre-built integrations with leading game providers, PSPs, CRMs, and compliance services.
- **Real-Time BI & Analytics** – Advanced dashboards for full visibility into player activity, transactions, and system performance.
- **Regulatory Compliance Built-In** – Support for Responsible Gaming, GDPR, AML/KYC, and multi-jurisdiction licensing requirements.
- **AI-Powered Risk & Engagement** – Intelligent tools for fraud detection, segmentation, and personalized rewards.
- **Omnichannel Experience** – Unified accounts and wallets across desktop, mobile, and retail environments.

One-Time License. Full Ownership. Complete Flexibility.

DiGER is designed to meet the realities of today's iGaming landscape:

- **One-Time License Fee:** Operators gain complete rights to the platform's infrastructure and codebase, with no recurring SaaS fees or revenue share obligations.

- **12 Months of Technical Support:** Comprehensive onboarding, training, and platform support during the first year of deployment.
- **Post-Year Autonomy:** Freedom to either maintain operations in-house or continue support with Digicode, ensuring long-term independence.

Built for Modern Operators

DiGER is particularly well-suited for operators in regulated and fast-evolving markets. Whether entering new jurisdictions, migrating from legacy platforms, or future-proofing operations, DiGER delivers the flexibility and compliance required to compete at scale. Several tier-two operators are already evaluating the platform as part of their 2025 growth strategies.

DiGER is ideal for operators in highly regulated and fast-evolving markets. Whether entering new jurisdictions, migrating from legacy platforms, or future-proofing operations, DiGER delivers the flexibility and compliance required to compete at scale. The platform is already being evaluated by several tier-two operators as part of their growth strategies.
