

"Distant Nouveau Unveil Debut Album "Champion" A Cross-Genre Journey of Passion, Resilience, and Melody

DISTANT NOUVEAU
SUMMER DREAMING

Hampstead, London Sep 9, 2025 ([IssueWire.com](https://www.issuewire.com)) - Emerging with a fresh yet nostalgic sound, Distant Nouveau announce the release of their debut 10-track album, **Champion**. The project is a powerful collaboration between **Lee Woodcock** of Nottingham and **Colin Read** of Southampton—two seasoned musicians who, despite living 200 miles apart, united through technology to craft a collection that uplifts, inspires, and resonates across genres.

The band's origins trace back to just a year ago when Lee responded to a call for a singer. What began as a simple collaboration quickly grew into a creative partnership, blending Colin's long-time passion for songwriting—shaped since his teenage years—with Lee's vocal depth and lyrical expression. Together, they created a sound that is uniquely Distant Nouveau.

Rooted in EDM and pop but infused with indie guitar dream pop elements, the album draws influence from legendary 80s pioneers and today's cutting-edge acts. The result is music layered with lush synths, ringing guitars, and soulful vocals, tied together by strong, memorable hooks.

“At the heart of our writing has always been the pursuit of strong, catchy melodies,” said Colin Read. “It feels like after all these years, we’ve finally reached our full potential.”

The album's standout title track, Champion, reflects the duo's message: with hard work and passion, any dream is possible.

With echoes of The Human League and The Cure, alongside the pulse of the 90s club scene, Champion is more than an album—it's a testament to creativity without borders. Despite never meeting in person, Lee and Colin have proven that technology can bridge distance, creating art that connects.
