

Encanto Technologies LLP Expands into AI & IoT-Powered Health, Wellness, and Fitness Solutions

Encanto Technology LLP drives AI & IoT-powered health, wellness, and fitness solutions, including telehealth, smart pharmacies, IoT clinics, and AI fitness platforms, delivering scalable, personalized HealthTech impact.

Indore, Madhya Pradesh Sep 26, 2025 (Issuewire.com) - Encanto Technologies LLP, a rising name in digital innovation, today announced a strategic pivot toward delivering **AI and IoT-driven health, wellness, and fitness solutions** while continuing to strengthen its presence in other domains such as enterprise software, cloud, and digital transformation consulting. The company aims to serve startups, nutraceutical and pharma firms, hospitals, and wellness brands with platforms that bridge long-standing gaps in access, personalization, and efficiency.

“We believe technology is the connective tissue between ambition and impact in health,” said **Deepesh Sonaniya**, Founder at Encanto Technologies LLP. “By marrying domain expertise with AI, IoT, and cloud, we want to enable scalable, trustworthy systems in telehealth, e-pharmacy, fitness tech, and more.”

Market Tailwinds & Data Points

- According to **Orion Market Research**, the [global pediatric telehealth market](#) was valued at **USD 28.03 billion in 2024** and is projected to reach **USD 297.63 billion by 2033**, growing at a CAGR of 26.65%.

- AI-driven healthcare technologies - including precision medicine and predictive diagnostics - are among the fastest-growing segments in digital health.
- The healthcare industry generates nearly **30% of the world's data**, yet over **80% of it is unstructured**, making **AI** and **IoT-enabled data systems** critical for actionable insights.
- **IoT in healthcare** is expanding rapidly, with connected devices like wearable ECG monitors, smart pill dispensers, and remote patient monitoring tools supporting better outcomes and real-time insights.

For healthcare providers and startups looking to implement AI + IoT solutions efficiently, **Encanto Technologies LLP** offers a full suite of platforms -> <https://encantotek.com/>.

Focus Areas of Innovation

Telehealth & Remote Care

- AI-powered triage, symptom checkers, and clinical decision support modules.
- **IoT-enabled remote monitoring**, tracking vitals and sending real-time alerts to clinicians.

Digital Pharmacies & Smart Medicine Delivery

- Predictive demand forecasting and inventory optimization.
- Smart reminders and dose adjustment logic for patient adherence

Virtual Fitness & Wellness Platforms

- AI-adaptive workout plans tied to biometric data.
- **IoT-driven wearables and connected fitness gear** for real-time performance and injury prevention.
- Nutritional & habit coaching with feedback loops.

IoT-Enabled Clinics & Hospitals

- Smart medical devices for continuous patient monitoring.
- Automated workflows for hospital operations and equipment management.
- Integrated dashboards for real-time clinical decision-making.

Strategic Partnerships

Encanto is actively seeking collaborations with:

- **Hospitals & Clinics** - to launch pilot programs in chronic care follow-ups, telehealth, and IoT-enabled patient monitoring.
- **Pharma & Nutraceuical Companies** - to integrate AI + IoT-driven solutions for medication adherence, clinical trials, and real-world evidence generation.
- **Fitness & Wellness Brands** - to co-create AI-powered consumer platforms that deliver personalized fitness, nutrition, and lifestyle insights.

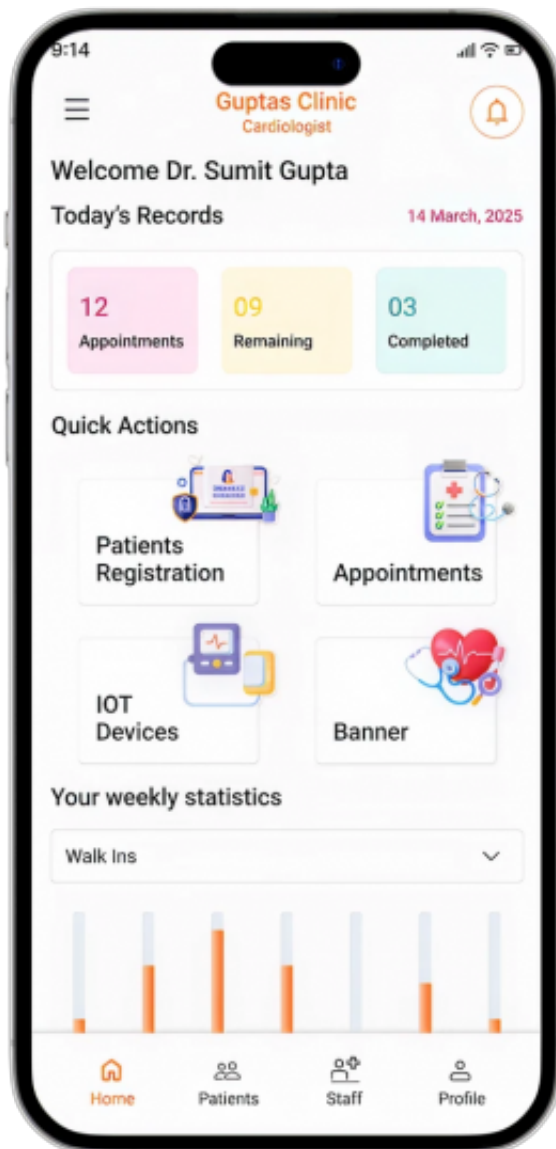

“Our strength lies in marrying healthcare domain insight with intelligent systems — we don’t just build software, we engineer trust,” added **Deepesh Sonaniya**, Founder at Encanto Technologies LLP.

About Encanto Technologies LLP

Encanto Technologies LLP is a full-stack technology and consulting company specializing in **AI, IoT, cloud, custom software, and enterprise integration**.
