

Espire Infolabs announces a Strategic Partnership with d.velop

London, England Sep 22, 2025 ([Issuewire.com](https://www.issuewire.com)) - Espire Infolabs, a global digital transformation and total experience pioneer, today announced a partnership with d.velop, a leading global provider of document management, archiving, and workflow automation solutions.

d.velop's industry-leading platform, combined with Espire's proven track record in delivering enterprise

content management (ECM) and document management system (DMS) solutions, will enable organizations to redefine the way they manage and utilize their content. From AI-powered automation and seamless enterprise integration to secure compliance and centralized information access, the partnership will help enterprises unlock content-driven innovation, accelerate digital transformation, and deliver connected experiences across the value chain.

This collaboration brings together Espire's expertise in ECM and digital transformation and d.velop's cutting-edge platform for enterprise-ready content management.

"We are delighted to announce our partnership with d.velop to further strengthen the way enterprises manage and unlock the true value of their content. ECM and DMS have always been a cornerstone of Espire's digital transformation services, enabling our global customers to streamline processes, ensure compliance, and deliver connected experiences. With this partnership, d.velop's advanced, AI-enabled platform will complement our long-standing expertise, allowing us to scale our capabilities, bring in deeper automation, and deliver even greater value to our customers. Together, we will accelerate innovation, drive business growth, and help enterprises build lasting resilience in today's fast-evolving digital economy." **stated Gautam Bhasin, CEO, Espire Infolabs**

"At d.velop, we share Espire's conviction that enterprise content is far more than static storage—it is the lifeblood of transformation. Every interaction, decision, and compliance requirement hinges on the ability for an organization to instantly access and act on information. Through our ECM platform and AI-powered process automation, we enable organizations to turn content into a true strategic asset: connecting systems like SAP, Microsoft 365, and Salesforce, embedding compliance by design, and empowering people to securely access the knowledge they require. We look forward to working with Espire to help enterprises not only unlock content-driven innovation but also build the agility and resilience needed to thrive in an increasingly complex digital landscape. Exciting times are ahead." – **Colin Dean, Regional VP UKI, d.velop**

The joint efforts of Espire Infolabs and d.velop will focus on delivering value-driven content management solutions that ensure compliance, improve productivity, and provide enterprises with end-to-end visibility of their business information. As organizations continue to prioritize digital transformation, this partnership will play a pivotal role in shaping the future of enterprise content management.

About Espire

Espire is a global digital transformation and total experience solutions provider with operations spread across 12 locations covering ANZ, SEA, EMEA, and North America regions. With over two decades of experience, Espire enables enterprises to deliver exceptional Customer Experience (CX), Employee Experience (EX), and Business Experience (BX)—powered by Multi-Experience (MX) and User Experience (UX). Espire's Enterprise Content Management (ECM) & Document Management System (DMS) solutions cut through complexity by simplifying, securing, and streamlining the entire content lifecycle. From faster collaboration and automated workflows to stronger compliance and better digital experiences, [Espire](#) helps enterprises turn content into a real asset for productivity and growth.

About d.velop
