

Farewell to Darwinian Evolution:

Exposition of God's Creation Patent and Seal

Toronto, Ontario Nov 13, 2025 (Issuewire.com) - Physicist Michael Ebifegha Challenges Darwinism in his Groundbreaking Book, *Farewell to Darwinian Evolution*

This release exposes flaws in Darwin's theory and presents God's "patent and seal" as the true claim to creation of the world.

Toronto, ON – In a bold and timely work, physicist, educator, and author Michael Ebifegha, Ph.D., takes direct aim at one of the most widely accepted scientific doctrines of modern history: Darwin's theory of evolution. His book, *Farewell to Darwinian Evolution: Exposition of God's Creation Patent and Seal*, dismantles the foundation of Darwinian thought and offers readers a compelling alternative rooted in both empirical science and divine revelation.

For over a century, evolutionists have defended the claim that species emerged gradually through random variation and survival-driven competition. Yet, as Ebifegha argues, empirical evidence demonstrates otherwise—that new species are formed rapidly, with intent, and through cooperation. By drawing on the works of respected scientists and philosophers, including Jerry Fodor and Massimo Piattelli-Palmarini (*What Darwin Got Wrong*), as well as publications such as *New Scientist*, which once declared "Darwin Was Wrong," Ebifegha underscores a growing chorus of credible voices that question the evolutionary framework.

"Darwinism and anti-Darwinism cannot both be right," Ebifegha explains. "Because science that is based on experiment is neutral, the only logical resolution is to bid farewell to Darwinism which is based on analogy and sustained by authority".

The book not only critiques Darwinian evolution as a scientific myth, but it also provides what Ebifegha describes as God's "patent and seal of ownership of the world." This claim, he argues, answers the age-old question: *Are we here by chance, or do we belong to an agent who has revealed our origin and purpose in life?*

With dual expertise in physics and religious studies, Ebifegha brings a rare balance of scientific training and spiritual conviction to his writing. He asserts that humanity's search for origins cannot be resolved by theoretical studies of nature alone, because "if nature, which obeys laws, is not the creator, then we must recognize the true claimant."

About the Author

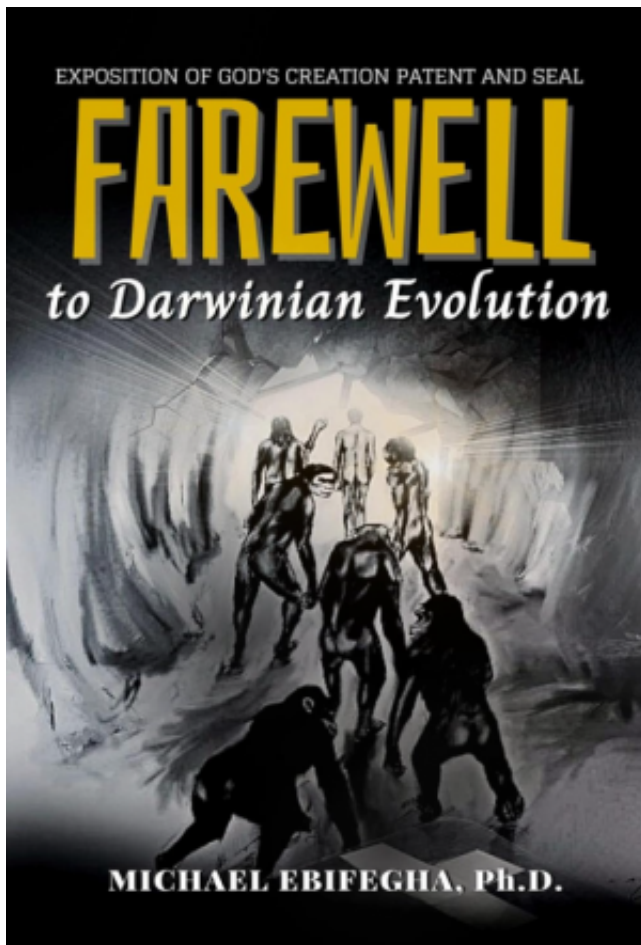

Michael Ebifegha holds advanced degrees in geophysics and physics from Ahmadu Bello University and Carleton University, as well as a Ph.D. in Physics and a B.Ed. in Science and Mathematics from the University of Toronto. He also earned a certificate in religious studies from the Toronto Catholic School Board. Currently a certified science, mathematics, and religion instructor at the Toronto District School Board, Ebifegha is the author of multiple works challenging evolutionary orthodoxy, including *The Darwinian Delusion*, *Creation or Evolution?*, *4th Origin*, and *Satan's Shadow in Abrahamic Religions*.

Availability

Farewell to Darwinian Evolution: Exposition of God's Creation Patent and Seal is available now in leading booksellers Ingram Spark.
