

FlipHTML5 Introduces Its AI Catalog Generator to Enhance Content Workflow

FlipHTML5 AI catalog maker enables users to produce professional digital catalogs quickly by inputting simple prompts, selecting page dimensions, and choosing color schemes, with AI handling the layout and content generation in minutes.

Hong Kong, Hong Kong S.A.R. Sep 5, 2025 ([Issuewire.com](https://www.issuewire.com)) - FlipHTML5, an established digital publishing platform, caters to e-commerce operators and content creators seeking efficient tools for building interactive product showcases. Through its [AI catalog](#) features, the platform empowers these users to turn basic ideas into refined catalogs that captivate audiences effectively.

Creating a catalog with FlipHTML5 is straightforward. Users visit the dedicated maker page, enter a descriptive prompt, select the book type, add optional demo content, set page size, choose up to three primary colors, specify the total pages, and pick the language. The AI brochure maker swiftly processes this to deliver a full ebook in just minutes, sparing busy professionals from tedious manual design.

After generation, users can personalize the AI catalog extensively via FlipHTML5's multimedia editor. This involves incorporating images, videos, audio clips, and interactive buttons to enrich product details. Tweaks to layouts, backgrounds, and logos ensure the output matches branding requirements, granting content creators complete oversight of visual and functional aspects.

For e-commerce operators handling extensive inventories, FlipHTML5's Excel-to-catalog feature integrates seamlessly with AI. By uploading an Excel or CSV file with product info like names, images, prices, and descriptions, the tool auto-populates and formats the data into a sleek catalog. This simplifies updates, minimizes errors, and lets sellers keep digital displays current with little hassle.

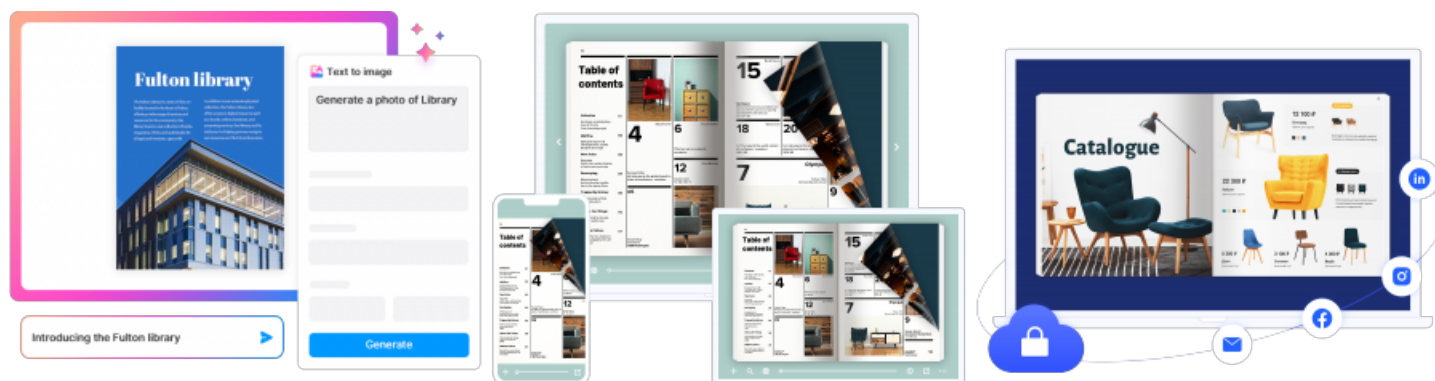

Additionally, FlipHTML5's AI catalog supports interactive enhancements like call-to-action buttons, clickable hyperlinks, and embedded charts, which e-commerce operators can leverage to guide customers toward purchases directly within the [electronic catalog](#). Content creators benefit from these elements by creating dynamic narratives that boost viewer retention and conversion rates without complex coding.

"We crafted the AI catalog maker to give users rapid creation power, and its integrated sharing options make distribution effortless—via embed codes, social shares, or direct downloads," said Winston Zhang, CEO of FlipHTML5. "This helps e-commerce pros connect with audiences swiftly and boost engagement."
