

From California to North Carolina, Music Saved His Life—Now He’s Spreading Love & Positivity

Inspired by EDM Greats and a DIY Ethos, the Artist Unveils His First Tracks on Ableton, Showcasing a Refined Sound and a Universal Message of Connection

Las Vegas, Nevada Sep 11, 2025 ([IssueWire.com](https://www.issuewire.com)) - Emerging electronic music producer Jesse Watson, known by his artist moniker **Sloth Philosophy**, has officially released his first two singles since a year-long creative hiatus, titled “Bog Walk” and “Closer to Clarity.” The tracks mark a significant milestone in the 25-year-old Las Vegas artist’s career, representing his first professional work produced on Ableton after years of honing his craft on mobile GarageBand.

Watson’s musical journey is a testament to modern DIY ethos. Inspired by stories of artists like T-Pain creating hits on “bad setups,” he embraced the limitations of his phone to develop a unique sound that blends energetic EDM with the nostalgic textures of video game music. His new work retains the signature vibes of his earlier productions while showcasing a marked evolution in technical skill and sonic depth.

Drawing inspiration from a diverse palette of artists including Ganja White Night, SMLE, Seven Lions, and LSDREAM, Sloth Philosophy’s mission is rooted in the belief that music is a universal language without boundaries. “When it feels like no one can listen or understand you, music’s got you,” Watson states. His goal is to create immersive auditory journeys that make listeners feel confident, uplifted, and understood.

The vibrant local Las Vegas music scene and the success of his peers serve as a constant motivator. Watson aims to channel this communal energy into his live performances, integrating comedy and dance to create a uniquely engaging and positive experience.

“Bog Walk” and “Closer to Clarity” are available now on all major streaming platforms. They are not just songs, but an invitation into the evolving world of Sloth Philosophy—a world built on the philosophy that great art can start anywhere and that music is always there to listen.
