

Goldsboro Spine Center Elevates Chiropractic Care with Advanced Therapies and Transparent Pricing

Goldsboro Spine Center, led by Dr. Wagner, launches an all-inclusive chiropractic care model that blends personalized treatment with advanced therapies like spinal decompression and Class IV laser, ensuring consistent, high-quality care.

Goldsboro, North Carolina Sep 13, 2025 ([Issuewire.com](https://www.issuewire.com)) - Goldsboro Spine Center, led by Dr. Wagner, Doctor of Chiropractic, is launching a new all-inclusive care model that redefines the patient experience. This innovative approach combines personalized chiropractic adjustments with advanced therapeutic technologies—without the confusion of complex billing or add-on charges.

New patients receive a comprehensive evaluation, including digital X-rays when appropriate, for just \$60. Follow-up visits are \$55 flat, and include chiropractic adjustments as well as additional therapies like spinal decompression or Class IV laser treatment, when clinically indicated. This transparent pricing ensures patients always know what to expect—both in care and in cost.

“At Goldsboro Spine Center, our mission is to provide the highest quality of care without upselling or unnecessary add-ons,” said Dr. Wagner. “We focus on results, not extras. This new model puts the patient first by making advanced chiropractic care both accessible and predictable.”

What sets Goldsboro Spine Center apart is its hands-on, personalized approach. Unlike clinics where

treatment is fragmented across multiple providers, every adjustment and therapy is performed directly by Dr. Wagner. This consistency enhances precision, builds trust, and delivers better results for patients seeking relief from back pain, neck pain, headaches, and other musculoskeletal conditions.

Goldsboro Spine Center serves patients from across Eastern North Carolina and is recognized in the community for its transparency, advanced technology, and commitment to long-term wellness. By blending proven chiropractic methods with modern therapies, the clinic continues to make high-quality care more accessible and meaningful for all.
