

GreenShip Services Welcomes New Government Law on Ship Recycling with Innovative Asbestos Removal and IHM Techniques

GreenShip Services, a pioneer in sustainable maritime practices, has embraced the Indian government's newly introduced law on asbestos handling and ship recycling.

Bhavnagar, Gujarat Jan 8, 2026 ([Issuewire.com](https://www.Issuewire.com)) - GreenShip Services, a pioneer in sustainable maritime practices, has embraced the Indian government's newly introduced law on asbestos handling and ship recycling. By integrating modern innovations and advanced techniques, the company is raising the bar for **Asbestos Removal Services in India** and **Ship Recycling Services in India**, ensuring worker safety, environmental responsibility, and international compliance.

Asbestos Removal is essential for ship recycling and removing Hazardous Material which is harmful to our health.

A Step Forward for India's Maritime Industry

The landmark legislation strengthens compliance with the **Inventory of Hazardous Materials (IHM)** framework, enforcing stricter asbestos management in ship dismantling yards. With alignment to the Hong Kong International Convention (HKC) and EU Ship Recycling Regulation (EU-SRR), India is cementing its position as a global hub for responsible ship recycling.

Arjun Banerjee, spokesperson for GreenShip Services, said:

"This law is a turning point for India's ship recycling industry. With innovation at the core, GreenShip

Services is proud to pioneer sustainable techniques that ensure compliance, safeguard workers, and protect the environment."

GreenShip's Innovations in Action

GreenShip Services has introduced cutting-edge methods that redefine industry standards:

- **Advanced Asbestos Removal:** Negative pressure enclosures, robotic tools, and high-efficiency filtration systems.
- **Smart IHM Surveys:** AI-enabled digital mapping for precise hazardous material identification.
- **Eco-Friendly Ship Recycling:** Hydro-blasting and cold-cutting processes that reduce emissions and improve safety.
- **Worker Protection:** Wearable monitoring devices and enhanced training for occupational safety.

GreenShip Services demonstrates leadership in three interconnected domains:

- **Asbestos Removal Services in India** — Advanced, reliable, and internationally compliant abatement solutions.
- **Ship Recycling Services in India** — Environmentally conscious dismantling with IHM certification.
- **Sustainable Maritime Innovation** — Integrating technology and eco-friendly practices into shipyard operations.

Looking Ahead

With the combination of the new government law and its advanced technologies, GreenShip Services is poised to transform the ship recycling landscape in India.

"Our mission goes beyond compliance. We aim to lead the industry with innovation, sustainability, and safety as our cornerstones," added Arjun Banerjee.

About GreenShip Services

GreenShip Services is a trusted maritime solutions provider specializing in **Asbestos Removal Services in India** and **Ship Recycling Services in India**. With a strong focus on compliance, innovation, and sustainability, the company aligns with global standards such as HKC and EU-SRR while delivering safe and eco-friendly solutions for the future of ship recycling.
