

inquid Introduces Smarter High Risk Merchant Account Solutions for Global Businesses

The company aims to provide faster approvals and reliable payment processing support to industries facing banking restrictions.

London, England Nov 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - Businesses in high-risk sectors often face delays, hidden costs, and rejection when applying for payment services. **inquid**, a global payment processing provider, has announced a refined approach to [high risk merchant account](#) approvals, giving merchants access to faster onboarding and secure transaction management.

With global demand for online payments growing, many merchants in industries such as forex, gaming, adult, and online casinos are still considered high risk by banks. This often results in limited access to [payment gateways](#) and higher processing fees. inquid addresses this gap by connecting merchants to trusted acquiring banks, reducing chargeback risks, and offering multiple methods including cards, wallets, and international transfers.

“Merchants should not be held back by the label of ‘high risk,’” said a spokesperson for inquid. “Our goal is to provide fair, transparent, and reliable payment processing that allows businesses to expand without unnecessary barriers.”

inquid’s platform focuses on three key areas:

- **Quick merchant account approval** with flexible underwriting
- **Chargeback management tools** to help merchants safeguard revenue

- **Global coverage** with payment gateways supporting multiple currencies

This new initiative reflects inquit's commitment to helping merchants accept payments confidently while maintaining compliance in high-risk markets.

About inquit:
