

KOBI Expands to 10 Languages, Bringing Dyslexia-Friendly Reading Support Across Europe

KOBI, the evidence-based reading platform built for children who struggle with reading, today announced the release of multiple new languages: English, Slovene, German, Italian, Dutch, Spanish, French, Portuguese, Croatian, and Polish.

Vrtolba, Gorishka Oct 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - KOBI, the evidence-based reading platform built for children who struggle with reading, today announced the release of multiple new languages: **English, Slovene, German, Italian, Dutch, Spanish, French, Portuguese, Croatian, and Polish.** Developed by a **Slovenian–Dutch team**, KOBI was designed with a special awareness of the needs of **smaller language communities**, which too often lack the high-quality educational tools available in larger markets.

KOBI is **made for kids with dyslexia—but it works for everyone.** The app focuses on the **toughest part of learning to read: integrating subskills like letter recognition and phonics into the end goal—reading connected text and understanding it.** KOBI is the only consumer reading app that **combines narrated books, built-in speech recognition, and a personalized, progressive sequence of words to learn** (available now in **English**, and **coming soon in Spanish**). This rigorous, **science-of-learning** approach—pairing decoding practice with real-time feedback and comprehension work—is rare among consumer solutions.

“Every child deserves world-class reading support in their own language,” said Ursula Lavrenčič, CEO & Co-founder of KOBI. “As a Slovenian–Dutch team, we know firsthand how underserved smaller language groups can be. Today’s expansion is a big step toward our mission to make KOBI available in all EU languages.”

KOBI is **already available to teachers in Slovenia** through an arrangement with the **Ministry of Education**, enabling classroom-ready access at scale. Next on the roadmap is a **Spanish feature pack** that adds **voice interactivity**, further enhancing decoding accuracy and conversation-based comprehension practice.

Availability & Demos

KOBI with multilingual support is available now in the KOBI app. **Schools and districts can request a demo** to see how KOBI supports decoding, fluency, and comprehension for diverse learners. Parents can download KOBI today <https://kobiapp.io/download>.

About KOBI

KOBI is an award-winning, AI-powered reading app addressing a critical gap in early education by helping children build reading fluency and confidence. Backed by the science of reading and developed with evidence-based design, KOBI combines adaptive technology, personalized scaffolding, and gamified practice to deliver measurable outcomes. Its modular features - like smart text formatting, real-time feedback, and voice-activated comprehension checks - enable scalable use both at home and in schools. Originally designed to support children with dyslexia and ADHD, it’s proven effective for all young readers.
