

“Louis Pasteur Condemns Big Pharma: Vaccines, Drugs, and Healthcare in the United States” by Stephen Heartland

Tomah, Wisconsin Sep 25, 2025 ([IssueWire.com](https://www.issuewire.com)) - Award-winning author Stephen Heartland challenges the medical establishment in his groundbreaking book, “Louis Pasteur Condemns Big Pharma”. A powerful blend of history, critique, and proposed reform, this book calls for nothing less than a transformation of modern healthcare.

At its core, the book revisits the life and work of Louis Pasteur, whom Heartland calls the *GOAT (Greatest of All Time)* in medical science. Despite not being a medical doctor, Pasteur revolutionized science with methods rooted in truth, transparency, and dedication to humanity’s well-being. Heartland argues that today’s system has strayed far from those principles, corrupted by financial interests and a lack of integrity.

Through five structured chapters, Heartland contrasts Pasteur’s methods with modern practices, exposing systemic problems in Big Pharma, Big Government, and Big Tech. He then lays out sixteen concrete solutions designed to restore transparency, integrity, and true scientific progress in healthcare.

Goals of the Book

- To inform parents about the realities of modern science, medicine, and healthcare so they can make better decisions for their children.
- To expose corruption and collusion within Big Pharma, government agencies, and Big Tech, while offering solutions to shift the focus from profit to health and safety.

About the Author

Stephen Heartland is not a doctor, nor does he have a formal medical background—much like Louis Pasteur himself. What he does have is the perspective of a father. After his own daughter was vaccine injured, and their pediatrician denied any connection, Heartland began a personal investigation into the financial and ethical corruption within healthcare. He uncovered insurance and pharmaceutical kickbacks given to pediatric offices for promoting vaccines—conflicts of interest that inspired his deep research and ultimately, this book.
