

Next-Generation Ice Making Innovation: SYOCHI Unveils Precision Cooling for Global Partners

From R&D to global distribution, SYOCHI delivers fast, precise, and customizable ice making solutions for commercial partners.

Ontario, California Oct 10, 2025 ([IssueWire.com](https://www.issuewire.com)) - [SYOCHI](#), a developer of advanced cooling and thermal control systems, has announced the release of its next-generation ice making technology designed for professional wellness, fitness, and sports recovery applications.

Combining intelligent temperature management with rapid cooling architecture, SYOCHI's latest systems deliver both slush and solid ice with exceptional precision. This innovation enables wellness centers, gyms, spas, and rehabilitation facilities to manage diverse recovery protocols within a single integrated platform.

The company's new models — the **G9** and **G10 All-in-One Plunge Ice Systems** — incorporate optimized plate exchangers, digital sensors, and multi-stage filtration for consistent, reliable operation in various environments. Each unit undergoes rigorous environmental testing and batch verification to ensure stable performance under global operating conditions.

SYOCHI's technology has already gained traction with international partners, including exclusive collaborations in New Zealand and Australia. To strengthen service reliability, regional after-sales and technical support centers have been established in both the United States and Australia.

"Innovation in cooling isn't just about temperature — it's about control and consistency," said **Anson**, CEO of SYOCHI. "We've spent years refining systems that can support recovery, performance, and precision in every environment."

In addition to product development, SYOCHI continues to expand its **OEM and ODM collaborations**, providing partners with flexible customization options in both design and performance.

About SYOCHI

SYOCHI is a global manufacturer of integrated ice bath and ice making systems, dedicated to advancing cooling technologies for wellness, fitness, and rehabilitation industries. With a commitment to precision engineering and long-term reliability, SYOCHI supports professional partners in more than 20 countries worldwide.
