

Nexta Security Forms Strategic Partnership with ART to Expand into Japanese Market

New York City, New York Sep 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - Nexta Security, a leading U.S.-based leading cybersecurity consulting firm, today announced a strategic partnership with ART Co., Ltd. (ART), a leading Japanese technology solutions provider. The partnership marks Nexta Security's official entry into the Japanese market, strengthening its ability to deliver cutting-edge cybersecurity services to enterprises in Japan.

The collaboration combines Nexta Security's expertise in application security, incident response, and proactive risk management with ART's established presence and client relationships in Japan. Together, the companies aim to provide Japanese organizations with advanced solutions to address evolving cyber threats and regulatory requirements.

"Japan represents a critical market for us, and ART is the ideal partner to help accelerate our growth in the region," said Alberto Begliomini, Managing Partner at Nexta Security. "Our mission is to help enterprises improve resilience, reduce risk, and prepare for the next wave of security challenges, and this partnership gives us a strong platform to achieve that in Japan."

"Advanced Research of Technologies, Inc. (<https://www.ART-Sentan.co.jp/>, Headquarters: Yokohama, Phone: 045-978-1292, President: Yasunobu Kudo) announced today that it has significantly strengthened its cybersecurity consulting services, a core pillar of its IT services, through a strategic partnership with Nexta Security, a leading U.S. cybersecurity consulting firm (<https://www.art-sentan.co.jp/press/2025-09-01.htm>). Through this new partnership, Advanced Research of Technologies, Inc. will provide cutting-edge, comprehensive, and world-class cybersecurity consulting services to Japanese clients. The combination of Advanced Research of Technologies, Inc.'s market presence and Nexta Security's global expertise will enable the company to stay ahead of evolving threats."

The partnership will launch with joint security assessments, application security program reviews, and incident response planning and execution, with expanded offerings to follow in 2026.
