

OneHubPOS and Dejavoo Team Up to Deliver Frictionless POS and Payments for Modern Merchants

Folsom, California Sep 24, 2025 ([IssueWire.com](https://www.issuewire.com)) - In a move set to streamline how merchants accept payments, OneHubPOS has officially joined forces with Dejavoo, a leader in secure, smart payment systems. This new integration combines two powerful platforms — POS and payments — into one fluid, reliable, and lightning-fast experience for restaurants, retailers, and liquor stores.

Whether you're flipping burgers or ringing up wine bottles, this partnership eliminates the pain of disconnected systems and slow checkouts. Merchants can now plug Dejavoo's cutting-edge terminals — like the P1, P3, P5, and P8—directly into their OneHubPOS system and start accepting EMV, contactless, and PIN debit payments instantly. No complex setups. No processor lock-ins. Just speed, control, and clarity at the register.

“We built this integration to cut through the noise. Merchants and resellers want plug-and-play simplicity, not tangled tech,” said **Satheesh Kanchi**, CEO of OneHubPOS. **“With Dejavoo, we’re giving them a payment experience that’s as fast and reliable as the businesses they run.”**

Why This Integration Matters:

Plug-and-Play Ready – Instant pairing, minimal setup. Just switch on and go.

Real-Time Sync – Transactions reflect instantly across terminals and POS—no delays, no mismatches.

Freedom of Choice – Merchants can bring their own processor—no more lock-ins.

Smarter Hardware – Supports Dejavoo's powerful, Android-based terminals with wireless connectivity, blazing speed, and built-in security.

Reseller-Ready – Faster onboarding, quicker go-lives, and more value to offer.

This integration isn't just about payments. It's about control, speed, and the freedom to scale without technical headaches.

“At Dejavoo, our mission has always been to empower merchants with secure, flexible, and future-ready payment solutions. Partnering with OneHubPOS allows us to extend that promise even further delivering a seamless, real-time payment experience that fits right into the flow of business operations. It's not just about processing a payment—it's about making every transaction smarter, faster, and frictionless,” said **Mony Zenou**, Founder and CEO of Dejavoo.

Ready to See It in Action?

The integration is now live and available to all OneHubPOS customers. Resellers and payment partners can take advantage of faster deployments, smoother support, and deeper value delivery. Read our [latest blog post](#) to know more.
