

## Palm Beach Residents Get Affordable Roof Cleaning Without Compromising Quality

Palm Beach homeowners now have access to professional roof cleaning at nearly half the usual cost, thanks to a new pricing model introduced by EM Pressure Washing.

**Greenacres, Florida Jan 8, 2026 ([IssueWire.com](https://www.IssueWire.com))** - Homeowners in Palm Beach now have a more affordable option for keeping their roofs clean and protected. EM Pressure Washing, a licensed and insured local company, has introduced [professional soft wash roof cleaning](#) at just **\$0.17 per square foot**, nearly 40% less than the market average.

For a typical 2,000-square-foot roof, the service costs about \$340, compared to the \$500–\$700 charged by most providers.

“Many homeowners want to protect their property but avoid roof cleaning because of high prices,” said **Mike Law, owner of EM Pressure Washing**. “We’re changing that by making professional care accessible to every neighborhood.”

### **Addressing the Real Cost of Dirty Roofs**

Florida’s black algae stains do more than harm curb appeal. They absorb heat, drive up air conditioning costs, and can shorten shingle lifespan, sometimes affecting warranties. EM Pressure Washing’s soft wash method uses low-pressure techniques and professional solutions to safely remove algae, mold, and stains. The process restores a roof’s appearance while extending its durability.

### **A Pricing Model Built on Trust**

Competitors commonly charge \$0.25–\$0.35 per square foot for similar services. EM Pressure Washing’s lower rate reflects the company’s goal of providing reliable, long-term value.

“We’d rather build lasting relationships than overcharge for a single job,” Law added. “Our business is about trust and keeping Palm Beach homes in top shape.”

### **Available Now Across Palm Beach County**

The new pricing is effective immediately for all residents in Palm Beach County. Appointments are usually completed within a week of booking, and free estimates are available.

Homeowners can schedule a service by [contacting us via our website](#).
