

PresaleWidget Launches Multi-Chain ICO Script and Presale Widget to Simplify Token Presale Deployment

PresaleWidget, powered by Blockshark, introduces developer-friendly presale software that streamlines token sale setup with audited smart contracts, investor dashboards, referral programs, and support for 17+ blockchains.

Manchester, England Sep 7, 2025 (IssueWire.com) - The [PresaleWidget](#), powered by [BlockShark](#), today announced the launch of its innovative **ICO script and presale widget**, giving blockchain startups, developers, and entrepreneurs a faster, more secure way to **deploy token presale platforms** across multiple blockchains.

Designed to eliminate the complexity of custom development, the embeddable **presale widget** allows projects to launch presale platforms in minutes with just a single line of code—supporting leading networks such as Ethereum, Solana, BNB Chain, Polygon, Tron, Avalanche, and more.

Simplifying Token Presales With Advanced Features

PresaleWidget combines the flexibility of a ready-made **ICO script** with the convenience of a plug-and-play widget. Projects can configure:

- Multi-chain presales across 17+ blockchains + custom chains

- Token sale parameters including caps, vesting, and pricing models
- Investor dashboards with real-time contribution tracking
- Referral programs with anti-sybil protections
- Secure smart contracts audited for transparency and safety

By providing a **non-custodial solution**, PresaleWidget ensures project teams never handle user funds directly, reducing risk while maintaining full decentralization.

Affordable Presale Solutions for Any Project

PresaleWidget offers cost-effective alternatives to custom development:

- **Launch Plan – \$599**: one-time license, full source code, documentation
- **Pro Plan – \$1,299**: installation support and priority service
- **Custom Plan**: tailored design and advanced integrations

These one-time fees make PresaleWidget one of the most affordable **presale script solutions**, saving projects thousands of dollars and weeks of development time.

Industry Momentum

“With PresaleWidget, we were able to deploy our token presale platform across multiple chains in days instead of months,” said Aurora Labs, an early adopter. “The platform’s multi-chain support made everything effortless.”

According to industry reports, token sales raised billions in 2024 alone, with demand for secure **crypto presale development tools** at an all-time high. PresaleWidget positions itself as a key solution for startups seeking reliable **ICO presale software** that scales with their community.

About PresaleWidget

PresaleWidget provides embeddable **presale and ICO script solutions** that simplify token presale deployment across multiple blockchains. With a focus on security, flexibility, and ease of use, PresaleWidget empowers blockchain innovators to launch presale platforms quickly and confidently.
