

RealCoderz Launches AI-Powered Workforce Automation Suite with Face Recognition and CCTV Integration

Transforming workplace efficiency with advanced AI-powered attendance, surveillance, and workforce management systems.

Elevate classroom management with seamless CCTV-based attendance tracking

Noida, Uttar Pradesh Sep 3, 2025 ([IssueWire.com](https://www.issuewire.com)) - RealCoderz, a leading innovator in AI-driven surveillance and HR technology, has announced the launch of its **next-generation Vision AI solutions** designed to automate workforce management, enhance security, and improve operational efficiency across industries.

The new solutions integrate [AI-powered CCTV surveillance](#), **facial recognition attendance systems, and intelligent workforce automation tools**, empowering organizations to streamline operations, eliminate manual errors, and ensure real-time insights into workforce productivity.

Next-Gen Vision AI for Smarter Workplaces

With businesses shifting toward digital-first operations, RealCoderz's Vision AI suite addresses the growing demand for **contactless attendance, workforce transparency, and intelligent monitoring**. The system leverages **AI-based face recognition, CCTV attendance systems, and visitor tracking** to provide a seamless, secure, and data-driven environment.

Key features include:

- **AI Attendance System** – Contactless, real-time employee check-in powered by facial recognition.
- **CCTV Face Recognition Attendance System** – Eliminates proxy attendance and ensures accuracy.
- **Workforce Analytics Dashboard** – Provides actionable insights on productivity, shift patterns, and compliance.
- **Visitor Tracking via CCTV** – Enhances workplace security with automated monitoring of guest entries.
- **Scalable Integration** – Compatible with HRMS, LMS, and ERP platforms.

A Step Toward Workforce Automation

“Our Vision AI solutions are designed to empower organizations with **automation, security, and intelligence**. By combining [AI-powered HRMS](#) with advanced surveillance, we are helping businesses transition to a smarter, safer, and more efficient future.”

Industry Applications

The Vision AI suite is designed for diverse industries including:

- **Education** – Automated classroom attendance and monitoring.
- **Corporate Offices** – Employee productivity tracking and access control.
- **Manufacturing & Industrial Units** – Workforce management across multiple shifts.
- **Healthcare & Hospitality** – Secure monitoring of staff and visitors.
