

RI Mining Launches Green Cloud Mining with Ethereum, XRP & Bitcoin, Offering \$12,777 Daily

Sustainable AI-powered contracts let investors earn stable daily income from ETH, XRP, and BTC—without hardware or complexity.

Airmont, New York Sep 3, 2025 ([Issuewire.com](https://www.issuewire.com)) - In a shifting crypto landscape marked by sustainability, portfolio diversification, and real-yield demand, **RI Mining** has quietly unveiled a new product aimed squarely at long-term investors and passive income seekers: a **Green XRP Cloud Mining Contract** delivering potential daily profits of \$12,777, without hardware, manual operation, or energy burden.

The announcement comes at a time when industry watchers note unusual wallet activity linked to the **Ethereum Foundation**, which reportedly intends to sell 10,000 ETH following a post-SharpLink realignment. **XRP**, meanwhile, continues to solidify its role as a core asset in global cross-border transactions—especially after recent legal clarity in the United States.

From Asset Holding to Infrastructure Yield

While short-term speculation dominated much of the last bull cycle, recent trends suggest a migration toward **infrastructure-layer participation**. As **Bitcoin (BTC)** holds above \$108,000, and **Ethereum (ETH)** floats near \$4,600, many seasoned investors are now asking: how can value be extracted daily, regardless of price action?

“Markets are cyclical, but infrastructure yields can be constant,” said a senior operations manager at RI Mining.

“We’re not just offering a mining contract—we’re inviting users to plug directly into the energy-efficient core of digital value creation.”

Highlights of RI Mining’s Green XRP Contract

- **Daily Profit Potential:** Up to **\$12,777/day** on higher-tier contracts
- **No Hardware, No Maintenance:** 100% cloud-based infrastructure
- **Clean Energy Supply:** Mining powered by hydro, solar, and wind in Canada, Iceland, and Scandinavia
- **Multicurrency Compatibility:** Users can quickly activate contracts using mainstream currencies such as XRP, BTC, ETH, DOGE, and USDT
- **Beginner-Friendly:** Free trial contracts, no prior experience needed

How It Works: Earning Daily Without Manual Involvement

Step 1 – Sign Up

Register via www.rimining.com and claim a [\\$15 signup bonus](#). New users also receive **\$0.60 per day** for daily logins.

Step 2 – Choose a Green Contract

Deposit ETH, XRP, or BTC and choose a short-term or long-term fast settlement contract mining package.

Step 3 – Let It Run

The platform’s automated system mines on your behalf. Income is calculated and distributed every 24 hours, with live dashboards and real-time tracking.

ETH, XRP, and Ma Yun: Market Energy Is Returning

- The **Ethereum Foundation’s on-chain wallet** activity—moving 10,000 ETH toward exchanges—has been interpreted as a shift toward strategic rotation amid growing network activity.
- **Jack Ma**, co-founder of Alibaba, reportedly noted at a recent Hong Kong fintech forum that “blockchain-based assets will outlive outdated regulatory thinking.” His comments triggered a renewed wave of interest across Asia.
- In the West, Bitcoin’s energy narrative continues to evolve as more mining shifts to renewable infrastructure—an area where RI Mining has had a presence since 2020.

Security & Sustainability: Two Sides of the Same Coin

- **ESG Infrastructure:** Data centers powered by 100% green energy
- **Encrypted Funds Storage:** Hot & cold wallet separation, AIG-backed asset insurance
- **Regulatory Compliance:** The UK’s legally registered company has a history of safe and reliable regulatory operations
- **Global User Base:** 190+ countries, multilingual support, round-the-clock assistance

What Analysts Are Saying

“XRP has moved beyond speculation—it’s infrastructure,” said Dr. Amelia Lin, an independent researcher on cross-chain remittance protocols.

“The fact that platforms like RI Mining are embedding green compute layers behind XRP returns is part of a broader maturation of the industry.”

About RI Mining

Founded in 2014 and headquartered in London, **RI Mining** is a global pioneer in cloud mining and digital asset infrastructure. The company supports major tokens—including XRP, BTC, ETH, and DOGE—via AI-optimized, renewable-energy-powered mining operations, serving over **1.8 million users** in 190 countries.
