Brookhaven, New York Jan 3, 2026 ([Issuewire.com](https://www.issuewire.com)) - RPAutomation Inc. proudly announces the acquisition of **Lynne Thompson Consulting/Quality Health Data**, a strategic move that marks a new chapter in the growth and expansion of **Clinical Registry Solutions (CRS)**. This acquisition significantly broadens CRS's service capabilities, extending its **cardiac registry support solutions** to more than **100 hospitals and clinical research organizations across the United States**.

For years, CRS has been recognized as a trusted partner in the healthcare sector, delivering expert **clinical data abstraction and registry management services**. With this acquisition, CRS doubles the number of healthcare organizations it supports, reinforcing its commitment to **accuracy, compliance, and quality improvement**. This milestone not only highlights CRS's growth but also demonstrates its dedication to advancing healthcare data management on a national scale.

Through this integration, CRS will continue to provide comprehensive services that include **clinical data abstraction, medical record abstraction, and registry management** across a wide range of national registries. Hospitals and research organizations partnering with CRS can expect a seamless experience, ensuring that data is captured, validated, and submitted with the highest level of precision.

This expansion enables CRS to strengthen its infrastructure, scale its workforce of highly trained data abstractors, and enhance its ability to deliver **cost-effective, remote, and reliable abstraction services**. By doing so, CRS supports healthcare facilities in meeting stringent reporting requirements, achieving regulatory compliance, and driving initiatives that directly improve patient outcomes.

The acquisition further aligns with CRS's mission of helping healthcare providers navigate the evolving landscape of quality reporting programs. By leveraging its expanded expertise and resources, CRS is uniquely positioned to deliver solutions that simplify abstraction, reduce administrative burdens, and empower organizations to focus on what matters most—**delivering exceptional patient care.**

With this milestone, **RPAutomation Inc. and CRS** reaffirm their vision of being the go-to partner for healthcare organizations seeking accuracy, scalability, and innovation in clinical data management.
