

# Shandong Bolt Machinery at 2025 Global Distributor Conference, Driving Intelligent Future in Power Equipment

Showcasing Technological Innovation, Expanding Global Market Presence, and Bolstering the Intelligent Upgrade of Power Equipment Industry

**Jinan, Shandong Jan 13, 2026** ([IssueWire.com](https://www.issuewire.com)) - On May 10, 2025, Shandong Bolt Machinery Co., Ltd. participated as a key exhibitor at the **2025 Global Distributor Conference** held in **Jinan**. The conference gathered renowned power equipment manufacturers and distributors from around the world, with Bolt Machinery standing out as a highlight due to its technological innovations and growing

influence in the global market for busbar processing and transformer manufacturing equipment.

### **Showcasing Innovative Technology and Supporting the Global Intelligent Transformation of Power Equipment:**

As a key player in the global power equipment industry, Bolt Machinery presented its latest intelligent products at the conference, including the new generation **CNC Busbar Processing Machine**, **Intelligent Turret-type Busbar Processing Machine**, and **Smart Transformer Winding Machine**. These products integrate **big data analysis**, **Internet of Things (IoT)**, and **automation control technologies**, designed to help global power equipment manufacturers increase production efficiency, reduce energy consumption, and drive the industry toward a greener, more intelligent future.

General Manager Mr. Wang of Bolt Machinery said, "We are honored to participate in this global distributor conference and engage with industry leaders and partners from around the world to discuss the future trends of the power equipment industry. Bolt Machinery is committed to providing our global clients with more efficient, intelligent, and environmentally friendly power equipment solutions to help them stand out in the competitive market."

### **Deepening International Collaboration and Sharing Market Opportunities:**

During the conference, Bolt Machinery engaged in in-depth discussions with distributors and partners from **Europe, Southeast Asia, the Middle East**, and other regions, further strengthening its connections with the global market. Bolt's **smart busbar processing equipment** and **transformer manufacturing equipment** attracted wide attention from attendees, receiving positive feedback from distributors across multiple countries.

A **distributor representative from Europe** stated, "Bolt Machinery's intelligent products have helped us succeed in highly competitive markets, particularly in improving production efficiency and reducing energy consumption. We are looking forward to further collaboration with Bolt to achieve even greater market breakthroughs."

### **Partnering for the Global Intelligent Upgrade of Power Equipment:**

As a driving force behind the intelligent transformation of the global power equipment industry, Bolt Machinery discussed long-term collaboration opportunities with international distributors and partners during the conference. In particular, the company is focusing on emerging fields such as **smart grids** and **renewable energy**, where Bolt, in collaboration with international partners, is developing and promoting more efficient power equipment to further propel the global power industry toward a smarter, more efficient, and sustainable direction.

Bolt Machinery staff at the booth remarked, "Through this conference, we not only showcased our technological innovations but also built closer ties with global partners. We believe that in the future, Bolt Machinery will work together with distributors worldwide to create an even brighter future."

### **Future Outlook:**

As the demand for intelligent, automated, and environmentally friendly equipment in the power industry continues to grow, Bolt Machinery will continue to increase its investment in research and development in areas such as **smart grids** and **green energy**. By strengthening collaborations with global partners, the company aims to further expand its influence in international markets.

General Manager Mr. Wang concluded, "This conference has provided a valuable platform for deeper cooperation between Bolt Machinery and our global partners. We will continue to adhere to the philosophy of 'innovation-driven, quality-based' to promote the intelligent development of the power

equipment industry and provide high-quality solutions for global customers.”

**Conclusion:**

Through the 2025 Global Distributor Conference, Bolt Machinery showcased its latest intelligent technologies, further consolidating its position in the global power equipment market. Moving forward, the company will deepen its global market presence, working alongside partners to meet the challenges and opportunities of the global power equipment industry.
