

Subcision Scar Treatment Bangkok | Best Acne Scar Clinic – BAC Clinic

Looking for the best acne scar treatment in Bangkok? BAC Clinic specializes in subcision, Infini RF, TCA CROSS, and Juvelook. Personalized care for visible results

Bangkok, Thailand Oct 3, 2025 ([Issuewire.com](https://www.issuewire.com)) - Introduction: Why Treating Acne Scars Requires More Than Just Creams

Acne scars are not just a cosmetic issue; they often affect self-esteem and confidence. For many,

topical creams and over-the-counter treatments simply cannot reach the deeper layers of scar tissue. That's why **professional acne scar treatments in Bangkok**—particularly **subcision scar treatment**—are becoming increasingly popular among patients seeking real results.

At **BAC Clinic Bangkok**, we specialize in **release–rebuild–restore** protocols that combine modern dermatological science with customized treatment plans.

What Is Subcision Scar Treatment?

Subcision (short for “subcutaneous incisionless surgery”) is a **minor surgical technique** specifically designed for **rolling scars and tethered boxcar scars**.

- **How it works:**

A fine needle or blunt cannula is inserted under the scar tissue to break the fibrous bands that pull the skin down.

- **Results:**

The released skin naturally lifts, while the controlled injury stimulates **new collagen production**, improving skin texture over time.

- **Best for:** Rolling scars, some boxcar scars, and scars tethered to deeper tissue.

Why Subcision at BAC Clinic?

At **BAC Clinic**, we don't just offer subcision as a standalone procedure. Our doctors evaluate your scar pattern and design a **multi-modal approach** for the best outcome:

- [Subcision](#) – to release deep tethered scars
- **Infini RF Microneedling** – to stimulate collagen remodeling
- **TCA CROSS** – to improve deep, narrow ice-pick scars
- **Juvelook Biostimulator** – to regenerate and fill scar tissue

This **combination therapy** delivers more visible results than any single treatment.

Clinical Evidence Supporting Subcision

Multiple studies confirm subcision's effectiveness in treating atrophic scars:

- A clinical trial published in the *Journal of Cutaneous and Aesthetic Surgery* found that subcision provided significant improvement in **rolling scars** after 3 sessions.
- When combined with microneedle RF or chemical reconstruction (TCA CROSS), results were **faster and longer-lasting**.

Treatment Process at BAC Clinic

- **Consultation & Scar Mapping** – Our doctor analyzes your scars under good lighting to determine the type and severity.
- **Local Anesthesia** – To ensure comfort during the procedure.
- **Subcision** – A fine cannula is inserted under the skin to release fibrotic bands.
- **Adjunct Treatment** – Infini RF, TCA CROSS, or Juvelook depending on scar type.
- **Aftercare & Healing** – Mild bruising/swelling for 3–7 days, collagen remodeling continues for weeks.

Pricing at BAC Clinic (Bangkok)

At BAC Clinic, we provide transparent and reasonable pricing:

- **Subcision + Infini RF:** 1,500+9,900 THB / session
- **TCA CROSS (Full Face):** 1,200-1,990 THB / session
- **Juvelook Collagen Stimulator:** 28,900 THB (2 sessions)

Package Example (per session):

Subcision + Infini RF + TCA CROSS + Juvelook = ~20,000–22,000 THB

How Many Sessions Are Needed?

- **Mild scars:** 2–3 sessions
- **Moderate scars:** 3–5 sessions
- **Severe scars (rolling + boxcar + ice-pick):** 5+ sessions, spaced 6–8 weeks apart

Even after 2 sessions, patients usually notice **visible improvements** in skin texture.

Recovery & Downtime

- **Downtime:** 2–5 days (mild swelling/bruising)
- **Sun Exposure:** Avoid direct sun for 7–10 days; use SPF 50+ daily
- **Visible Improvement:** Within 4–6 weeks, with progressive collagen remodeling

Frequently Asked Questions (FAQs)

Q: Is subcision painful?

A: The procedure is done under local anesthesia, so you will feel pressure but minimal pain.

Q: Can I combine subcision with laser?

A: Yes, at BAC Clinic we often combine [Picosecond Laser](#) or [Infini RF](#) with subcision for optimal results.

Q: How soon can I return to work?

A: Most patients return within 2–3 days with only minor bruising.

Why Choose BAC Clinic Bangkok?
