The Ndege Group Launches The African Rare Earth Mineral Fund to Drive Equitable Resource Exploration

Africa's Sovereign Development Trust® Spearheads Sustainable Value Creation with a Focus on Rare Earth Minerals

London, United Kingdom Sep 17, 2025 (Issuewire.com) - The Ndege Group Nominees Limited, the management company for The Ndege Group, Africa's Sovereign Development Trust® (ASDT), today announced the formal launch of a new internal vehicle: the **African Rare Earth Mineral Fund.**This strategic initiative is designed to be a cornerstone of the Trust's mission, facilitating equitable and mutually beneficial socioeconomic transformation across the African continent.

The fund is an internal vehicle dedicated to the responsible acquisition, management, and export processing and transit of precious stones and metals. It will focus on both industrial and commercial applications on a global scale. The fund operates under the stewardship of The Ndege Group Nominees Limited and is a key component of the **Ndege Foundation's Development Finance Fund**, sitting alongside other critical internal programs such as The Daudi Mutuku Fund for Education, the Water Management Fund, and Ndege's Infrastructure Fund.

This launch is a direct reflection of The Ndege Group's integrated operational philosophy, which empowers its ecosystem of brands to work in concert toward African self-sovereignty. The fund's activities will directly support the broader goals of:

- **Ndege Aerospace©:** Focusing on cargo, VIP transit, and telecommunications.

- **Ndege MarketPlace©:** A blockchain-based e-commerce platform for specialist African goods.

- **The Ndege Foundation©:** A Real Estate Investment Trust and African Development Finance Fund.

- **OmniGaza®:** The forthcoming foundational blockchain-based platform for sovereign finance and continental governance.

- **United African Defence Force© (UADF):** The security framework for the Trust's digital assets.

At its core, The Ndege Group believes that durable change is built on a foundation of sound policy and practical programs. The African Rare Earth Mineral Fund reinforces this commitment by building self-sustaining value chains that ensure resource wealth directly benefits African stakeholders, especially the underprivileged.

This strategic direction will be a primary topic at the inaugural **Sandton Symposium 2025**, the first in a series of annual events hosted by ASDT. The symposium will convene continental and industry leaders to practically discuss and begin the implementation of treaties and programs for Africa's long-term development.

About The Ndege Group Nominees Limited The Ndege Group Nominees Limited serves as the management company for The Ndege Group, Africa's Sovereign Development Trust®. The Trust is a collective of brands and initiatives dedicated to implementing strategic, long-term programs that foster economic sovereignty and sustainable, equitable development across the African continent.
