

The World's first AI hair dryer by AENO

Meet AI ProDryer – The most Intelligent hair dryer ever created.

**Patented AI
auto start-stop
technology**

Limassol, Cyprus Oct 1, 2025 ([Issuewire.com](https://www.issuewire.com)) - [AENO](#) proudly launches a beauty breakthrough: AI ProDryer – the world's first AI-enhanced hair dryer. This is not just a tool it's a new era in hair care. Engineered with patented technologies, AI ProDryer redefines how we dry, protect, and style hair.

But what does "AI" really mean in AI ProDryer?

AI ProDryer was trained using artificial intelligence to perform like a professional stylist. AENO used real

consumer behavior data how people move, hold, adjust, and style and applied machine learning to fine-tune every function. From heat control to motor response, every detail is optimized to deliver salon-quality results at home, without needing professional skills.

Key intelligent features and how they transform the user experience:

Patented AI auto start-stop

Forget switches. The dryer starts when you lift it and stops when you set it down. This intuitive design makes drying effortless, energy-efficient, and seamless as if the device understands your rhythm.

Patented AI auto temperature control

The hair dryer constantly measures the distance between your hair and the dryer, adjusting heat output in real time. This means optimal drying without risk of overheating a major win for hair health.

Patented AI overheating protection

The system detects when temperatures rise too high and immediately adjusts to prevent overheating. This protects not just your hair, but the dryer itself extending its lifespan while maintaining consistent performance. No more fried ends, no more styling regrets.

Voice control: say it, style it

Control your hair dryer like never before with your voice. Just say “AI on,” “soft,” “hot,” or “cold,” and the ProDryer responds instantly. This hands-free functionality adds comfort, modernity, and a touch of magic to your routine, especially when both hands are busy styling.

InfraCare technology: dual-action light therapy for real hair benefits

AI ProDryer goes beyond traditional drying it introduces InfraCare, an advanced light-based treatment system developed by [AENO](#). At its core is a cutting-edge multi-emitter LED module that delivers two types of light from a single source: invisible infrared light and visible blue light at 490 nm.

While infrared light penetrates deep into the hair structure, delivering gentle and efficient heat from within, the blue light provides a calming, antibacterial effect on the scalp. The result is a synergistic therapy that not only speeds up drying but also promotes a healthier scalp and shinier, stronger hair.

The blue glow you see during use isn't just for looks it signals that the therapeutic light treatment is active, giving users visible reassurance that their hair is receiving real care during every session.

Touchscreen interface for total control

Sleek and responsive, the digital screen lets you adjust temperature and airflow with precision. With 14 combinations of speed and heat, every user can find their perfect setting whether you're in a hurry or crafting a detailed style. It's simplicity and sophistication, in one swipe.

Ionization for smooth, glossy hair

The ProDryer's built-in ionization system helps neutralize static and reduce frizz. It closes the hair cuticle to enhance shine, leaving your hair looking healthier, smoother, and easier to manage. It's not just about drying it's about elevating your hair's natural beauty.

Five magnetic nozzles for styling freedom

From sleek and straight to bouncy curls or voluminous waves, the ProDryer includes five magnetic attachments for every hair type and styling goal. The magnetic connection makes switching quick and easy no tools, no frustration, just creativity.

Lightweight, powerful, and quiet

Weighing just 600 grams, the ProDryer is comfortable to hold, even for long styling sessions. The professional brushless motor delivers high-speed airflow while staying remarkably quiet so you can enjoy power without the noise.

Travel ready and energy smart

The included travel case protects your device wherever you go, while the energy-efficient motor and gravity sensor reduce power consumption when not in active use. It's a smart choice for both everyday use and life on the move.

Why it matters

The AI ProDryer isn't just about looking good it's about feeling confident, in control, and cared for. Every feature is designed to make styling faster, safer, and more enjoyable. Whether you're a beauty enthusiast or someone who simply wants to get ready quicker, this dryer adapts to your needs, your hair, and your lifestyle.
